Introduction

Thank you for choosing the Garmin® eTrex Legend® H or eTrex Vista® H. These units use the proven performance of Garmin high-sensitivity GPS and full-featured mapping to create an unsurpassed portable GPS receiver. The eTrex models operate identically except that the Vista H has an electronic compass and a barometric altimeter and the Legend H does not. Take a moment to compare the contents of this package with the packing list on the box. If any pieces are missing, contact your Garmin dealer immediately.

Tips and Shortcuts

• To return to the Main Menu from any page, press the MENU key twice.
• To extend battery life, turn off the GPS when not using the eTrex for navigation. Decrease the level of the display’s backlight by quickly pressing and releasing the POWER key.

Product Registration

Help us better support you by completing our online registration today. Go to http://my.garmin.com. Keep the original sales receipt, or a photocopy, in a safe place.
Introduction

The serial number is located inside the battery compartment.

Contact Garmin
Contact Garmin Product Support if you have any questions while using your eTrex Legend H or Vista H. In the USA, go to www.garmin.com/support, or contact Garmin USA by phone at (913) 397.8200 or (800) 800.1020.

In the UK, contact Garmin (Europe) Ltd. by phone at 0808 2380000.

In Europe, go to www.garmin.com/support and click Contact Support for in-country support information, or contact Garmin (Europe) Ltd. by phone at +44 (0) 870.8501241.

Optional Accessories
For a complete list of available accessories and maps for use with the eTrex, refer to http://buy.garmin.com.

See the Important Safety and Product Information guide in the product box for product warnings and other important information.

Installing Batteries and the Lanyard

The eTrex operates on two AA batteries (not included). Use Alkaline, NiMH, or Lithium batteries. See page 48 for setting the battery type.

To install the batteries:
1. Remove the battery cover by turning the locking ring 1/4 turn counter-clockwise and pulling the cover loose.
2. Insert the batteries, observing the proper polarity.

Remove the batteries when you do not plan to use the unit for several months. Stored data is not lost when batteries are removed.
To install the lanyard:
1. Place the loop of the lanyard through the slot at the base of the unit.
2. Route the strap through the loop, and pull tight.
Understanding Terms

Select—move the highlighted area on the screen up, down, left, or right with the ROCKER to select individual fields.

Key—when you are directed to press a key, press and quickly release the key.

Field—the location on a page where data or an option can be shown or entered.

On-screen button—use the ROCKER key to select a button, and press it in to enter.

Scroll bar—when viewing a list of items too long to appear on the screen, a scroll bar appears next to the list. To scroll through a list, press up or down on the ROCKER, or press the In and Out Zoom keys to scroll rapidly.

Default—the factory setting saved in the unit’s memory. You can change the settings, and revert to the factory settings when you select Restore Defaults.

Manual Conventions

In this manual, when you are instructed to select an item, small arrows (>) appear in the text. They indicate that you should highlight a series of items on the screen using the ROCKER, and press in to enter after each item. For example, if you see “select Service > Show Info,” you should highlight Service,
and press the **ROCKER**. Then highlight **Show Info**, and press the **ROCKER** again.
Key Functions

IN/OUT Zoom keys

From the Map page, press to zoom the map in or out.

From any other page, press to scroll up or down a list or move a highlighted slider.

MENU/FIND key

Press and release to view the Options Menu for the current page.

Press and hold to display the Find Menu.
ROCKER key

Rock up, down, right, or left to:

- move through lists
- highlight fields, on-screen buttons, or icons
- move the map panning arrow.

Press in and release to enter highlighted options and data or confirm on-screen messages.

Press in and hold at any time to mark your current location as a waypoint.

QUIT/PAGE key

Press to cycle through the main pages.

Press and hold to turn the electronic compass on or off (Vista H only).

POWER key

Press and hold to turn on or off.

Press and release for contrast, backlighting, or to view time, date, and battery capacity.

Turning on the eTrex

To turn the eTrex on and off:
Press and hold POWER.
Adjusting the Backlight

To adjust the backlight level:
1. Press and quickly release the POWER key.
2. Press up on the ROCKER to increase the brightness and down to decrease.
3. Press the ROCKER or QUIT to close.

Initializing the GPS Receiver

The first time you turn on your eTrex, the GPS receiver must collect satellite data and establish its current location. To receive satellite signals, you must be outdoors and have a clear view of the sky.

To initialize your eTrex:

Hold the unit in front of you facing the sky.

While the GPS receiver is searching for the satellite signals, “Acquiring Satellites” is displayed until enough signals are acquired to fix its location.

If the unit cannot establish a satellite fix, a list of options...
appears. Highlight the appropriate option, and press the **ROCKER**.

**The Status Bar and Date and Time**

The Status Bar and Date/Time Window appear below the backlight adjustment slider when you press and release **POWER**.

Power to the unit is provided by batteries or from an auxiliary source. Power status is shown on the Main Menu and the Status Bar. The battery power icon shows the remaining power as the battery is depleted. The external power icon is shown when the unit is powered externally.

Satellite signal status is shown when searching for or acquiring satellites, a 2D fix is attained and a 3D fix is attained.

The Electronic Compass (Vista H only) appears when activated.
Using the Mapping Databases

Many of the eTrex features require detailed mapping data to be fully operational, so you need to transfer maps before using the unit. With optional detailed MapSource® mapping data, you can view listings of nearby restaurants, lodging, shopping centers, attractions and entertainment, and addresses. The amount of data transferable is 24 MB.

Use the USB interface cable, provided with the unit, to transfer optional MapSource data from a computer to the eTrex. See the Garmin Web site www.garmin.com for compatible MapSource products.
Basic Operation

This section explains some of the more common operations you can perform with your eTrex, including creating and using waypoints, using the Find Menu, and how to create and use tracks and routes.

Creating and Using Waypoints
Waypoints are locations or landmarks you record and store in your GPS. You can add waypoints to routes and even create a Go To directly to the selected waypoint.

You can create waypoints using three methods. Press the

ROCKER while at a location, create a waypoint on the Map page, or enter coordinates for a waypoint manually.

Marking Your Current Location
Press in and hold the ROCKE to mark your current location creating a new waypoint. You must have a valid position (2D or 3D) fix to mark your current location.
Basic Operation

Mark Waypoint Page

To mark your current location:
1. Press and hold the ROCKER until the Mark Waypoint page appears. A default three-digit name and symbol are assigned to the new waypoint.

2. To accept the waypoint with the default information, select OK.
OR
To change any information, select the appropriate field, and press the ROCKER to open the on-screen keypad. After entering and confirming your changes, select OK.

Creating Waypoints Using the Map

To create a waypoint using the Map page:
1. On the Map page, use the ROCKER to move the pointer to the map item you want to mark.
2. Press release the **ROCKER** to capture the pointer location and open the information page for the map item.

3. Select **Save**. If there is no information for that point, a “No map information at this point. Do you want to create a user waypoint here?” prompt appears. Select **Yes**.

**Editing Waypoints**

You can edit waypoints to change the symbol, name, note, location, and elevation.

**To edit a waypoint:**
1. Press and hold **FIND**.
2. Select **Waypoints**.
3. Select the waypoint you want to edit, and press the **ROCKER**.

4. Make changes by highlighting each field. Use the waypoint symbol chart and alphanumeric keypad to enter new data.

**To delete a waypoint:**
From the Waypoints page, select the waypoint you want to delete > **Delete**.

**NOTE:** When you delete a waypoint, you cannot recover it from the unit.

**To move a waypoint on the Map Page:**
1. Press **FIND** > **Waypoints**.
2. Select the waypoint you want to move, and press the **ROCKER**.
3. Select **Map** to show the waypoint on the map.
Basic Operation

4. Press the ROCKEGER to place a move marker next to the waypoint.

5. Use the ROCKEGER to move the waypoint to a new location, and press the ROCKEGER.

To calculate a location by averaging:
1. Go to the location that you want to calculate an average for. Press and hold the ROCKEGER > Avg to begin averaging.

2. Press Save.

Projecting a Waypoint
Create a new waypoint by projecting the distance and a bearing from one location to a new location.

To project a waypoint:
1. Press FIND > Waypoints.

2. Select the waypoint you want to project. The Waypoint Information page opens.

3. Press MENU > Project Waypoint to open the Project Waypoint page.

4. Enter the distance and bearing to the projected waypoint in the appropriate fields, and press QUIT when finished.

Using the Find Menu
Use the Find Menu to search for waypoints, geocaches, cities, and exits in the eTrex basemap. Additional icons appear depending on the optional MapSource data loaded to the unit. Press and hold the FIND
key to open the Find Menu.

When you access a Find group list, it contains items near your current location or the map pointer.

The options menu for each category contains search options. Select a category.

**Find By Name**
Use Find By Name if you know the name of the location you want to find.

To find a location using Find By Name:
1. Press and hold FIND to open the Find Menu.
2. Select the icon for the type of item you want to search for, or search the entire database by selecting *All Points of Interest* (with optional MapSource detailed maps).
3. Press MENU > Find By Name.
4. Use the ROCKER to operate the on-screen keypad and enter the name of the location you want to find. When the Find list contains a match, highlight OK.
5. Select the location item from the Find list and press the ROCKER. The item’s information page opens, allowing you to save the item as a waypoint, show the item on the map, or create a route to the item (Go To).
Recent Finds
The Recent Finds page shows a list of the last 50 items you have searched for or gone to recently.

To go to a recently found item:
1. Press and hold FIND.
2. Select Recent Find.
3. Use the ROCKER to select the item you want to go to, and press the ROCKER.
4. Select Go To.

Using the Find Item Information Page
When you select an item from the Find item list and press the ROCKER, detailed information about the item is shown. Each information page contains three on-screen buttons. Different buttons appear depending on whether you are selecting a Find item to navigate to, or adding a Find item to a route list as a waypoint.

Find Information Page Options Menu
To use the Options Menu:
1. With an information page open for a Find item, press MENU to open the Options Menu.
2. Use the ROCKER to select an option:
   • Average Location—takes several readings at the same location and uses the average value to provide more accuracy. See page 16.
• **Project Waypoint**—create a waypoint by entering bearing and distance from a referenced location. See page 16.

• **Find Near Here**—return to the Find Menu to search for map items near the item.

• **Change Reference**—point to a new location on the Map page using the pointer.

• **Add To Route**—include this item on a new route or add it to an existing route. See page 27.

• **View Sun And Moon**—view Sun and Moon tables for this item’s location. See page 57.

• **View Hunt And Fish**—view Hunt and Fish tables for this item’s location. See page 57.

• **Reposition Here**—reposition the location of the waypoint to your current location.

**To find an item near another item:**

1. Press and hold **FIND**.
2. Select a category.
3. Select an item from the Find list.
4. Press **MENU > Find Nearest**. The Find Menu opens with each category containing items near the item selected.
5. Select a category icon, and press the **ROCKER** to open a list of items near the item.
Basic Operation

To find an item from another location on the map:
1. Press and hold FIND.
2. Select an icon on the Find Menu.
4. Use the ROCKER to pan the arrow (pointer) to the map location you want. The Find list shows a list of items near the new map location.

Finding a Waypoint
The Waypoints page contains a list of all saved waypoints. Waypoints are stored in alphanumerical order and are identified by an assigned symbol.

To find a waypoin:at
1. Press and hold FIND.
2. Select Waypoints and choose a waypoint.

Finding a Geocache
Select Geocache to view the list of geocache locations created by you or downloaded from your computer. A geocache location is a waypoint with a geocache symbol to separate it from others. For more information about geocaching, visit www.geocaching.com.

To find a geocache:
1. Press and hold FIND.
2. Highlight Geocache. You can view found geocaches or those that have not been found.
3. Use the **ROCKER** to highlight a geocache on the list.

4. Select **Go To** to navigate to the geocache location. When navigating to a geocache, the Compass page changes to Geocache Navigation mode and any additional information about the downloaded cache location is shown in the comment field.

When a geocache is found, the unit marks the cache as found, logs an entry into the calendar, and provides an option that shows the nearest cache.

**Finding a City**

Select **Cities** from the Find Menu to find any city listed in the mapping data.

---

**To find a city:**

1. Press and hold **FIND**.

2. Select **Cities**. The Cities page shows a list of cities near your current location.

3. Select a city from the list, and press the **ROCKER**.

   OR

   If the city you want is not listed, press **MENU** > select a search method.

**Finding an Interstate Exit**

Use the exits icon on the Find Menu to find an interstate exit.

**To find an interstate exit:**

1. Press and hold **FIND**.

2. Select **Exits**. A list of interstate exits near your location is shown.
3. Use the **ROCKER** to select an exit, and press the **ROCKER**. This page contains the exit description, a list of available services near the exit, and the distance and bearing from the exit to the highlighted service.

4. Select a service from the list, and press the **ROCKER**.

**Finding an Address**

If you downloaded detailed mapping data, use the addresses icon on the Find Menu to find an address. When you enter the street number, street name, and city, the find feature matches that data with addresses in the map database.

**To find an address:**

1. Press and hold **FIND**.

2. Select **Addresses**.

**NOTE:** If your unit has a GPS fix, the `<Enter Region>` field is populated with your current region. You do not have to specify a city in the `<Enter City>`, because the database has information for the entire region.

3. Select the `<Enter Number>` field and type the street number using the on-screen keypad. Select **OK**.

4. Select the `<Enter Street Name>` field. The street list opens.

5. Use the on-screen keypad to enter the street name. Select **OK**. A list of matches appears.

6. Select the address.
Finding an Intersection
This feature also requires detailed mapping data. Follow the basic steps for finding an address when searching for an intersection.

Searching for a Point of Interest
If you downloaded MapSource detailed mapping, you can use the All Points of Interest category on the Find Menu to locate a nearby restaurant, lodging, or landmark, or to select a category.

To find a point of interest:
1. Press and hold FIND.
2. Select All Points of Interest to show a list of all points near your current location.
3. Press MENU.
4. Select an item from the list, and press the ROCKER.

Using Tracks
The Tracks feature creates an electronic bread crumb trail, or “track log,” on the Map page as you travel. The track log contains information about points along its path.

The track log starts recording as soon as the unit gets a location fix. The percentage of memory used by the current track log appears at the top of the Tracks page.
Basic Operation

To clear the track log:
1. Press **MENU** twice to open the Main Menu.
2. Select **Tracks**.
3. Select **Clear > Yes**.

To set up a track log:
1. Press **MENU** twice > **Tracks**.
2. Select **Setup**.
   - **Wrap When Full**—the track log records over the oldest data with new data.
   - **Record Method**—select a track recording method. Touch Distance, Time, or Auto. If your record method is time or distance, enter the specific time or distance interval. Touch Auto to record the tracks at a variable rate to create an optimum representation of your tracks.
   - **Interval**—select a track log recording rate. Recording points more frequently creates a more-detailed track, but fills the track log faster.
   - **Style**—selects the type of line that represents the track currently being recorded.
To save the entire track log:
1. Press **MENU** twice > **Tracks**.
2. Select **Save**. A message appears asking you if you want to save the entire track.
3. Select **Yes** to save the track.

To save a portion of the track log:
1. Press **MENU** twice > **Tracks**.
2. Select **Save**.
3. Select **No** to save only a portion of the track log.
4. Use the **ROCKER** to move the pointer to the point on the track line that you want to be the beginning point, and press the **ROCKER**.
5. Repeat to select an ending point. Select **OK**.

To view a track on the map:
On the Saved Track page, select **Map**. A map showing the entire track appears. Begin and end markers are added to the track.

To calculate the area of a track:
1. With the Track Log page open and the Track Log on, press **MENU**.
2. Select **Area Calculation**, and press the **ROCKER**.
3. Press the **ROCKER** to start the area calculation. As you move and define the area’s boundaries, a **Stop** button appears on the page.
4. When finished defining the area, press the **ROCKER** and select **Save**.
Track Profiles
A Track Elevation Profile is created from elevation readings when using the eTrex Vista H. Both the Vista H and Legend H show profiles, if using Digital Elevation Model (DEM) maps. Refer to the Garmin Web site for information about these maps.

To view a track profile:
1. Open the Saved Track page, and press MENU.
2. Select Profile. The beginning of the track is marked by a flag. Use the ROCKER to scroll across the track profile. At any point along the profile, press the ROCKER to show it on the map.

3. Press MENU to use Zoom Ranges and Hide Symbols options.

Navigating a Saved Track
To use the TracBack® feature:
1. With the Saved Tracks page for the track or the Track Log open, select TracBack, to show the track. Select the point to TracBack.
2. Use the ROCKER to move the pointer to the point on the map to start navigating the TracBack.
3. Move in the direction of the first turn. At the first turn, directions to each turn are shown.
4. Select **MENU > Stop Navigation** to exit.

**To create a waypoint on a saved track:**
1. With a saved track on the map, use the **ROCKER** to move the pointer on the track point that you want to mark as a user waypoint.
2. Press and hold the **ROCKER**.

**Creating a Route**
Routing creates a sequence of waypoints that lead you to your destination. The eTrex stores 50 routes with up to 250 points each. Create or modify a route using the Routes page, and add waypoints to a route. Create complex routes using optional MapSource mapping.

**To create a route:**
1. Press **MENU** twice > **Routes**.
2. Select **New > <Select Next Point>**.
3. Use the Find Menu to select a route waypoint from one of the Find groups.
4. Select **Use** to add it to the route.
5. Repeat steps 2 through 4 to add additional waypoints to the route.
6. Select **Navigate**.
Methods for routing you to a destination

- If you select Go To on the Waypoint page, or for other Find items, a straight path is created.
- If you select Navigate when on a Route page, the eTrex uses a route made of waypoints or Find Menu items. It navigates directly from point to point.

Navigating a Route

To navigate a saved route:
1. Press MENU twice > Routes.
2. Select a saved route > Navigate.
3. To stop navigating, press MENU > Stop Navigation.

To preview the turns for an active route:
1. From the Routes page, select a saved route.
2. Select Navigate to begin navigation.
3. Press QUIT to view the list of turns on the route. To view an individual turn, select it.
4. Use the ROCKER to scroll through all turns.

Editing a Route

Use the Route page to edit, change the route name, and review route points.

To change the name of the route:
1. Press MENU twice > Routes.
2. Select a saved route > select the route name field at the top of the Route page.

To review individual route points:
1. Press **MENU** twice > **Routes**.
2. Select a saved route > select a point on the Route page > press the **ROCKER** > **Review**.
3. Select **Save**, **Map**, or **Go To**.

To delete a route:
From the page for that route press **MENU** > **Delete Route**.

To select the off-road transition for a route:
1. Press **MENU** twice > **Routes** > **MENU**.
2. Select **Off Road Transition** > **Route Leg Transition**.

3. Select **Manual** (or **Distance**) when advancing to the next point.

Select **Distance** to enter a radius, so that when within the entered distance, you are lead to the next point.

Select **Manual** to transition to the next point anytime while navigating a route.
Main Pages

The eTrex Vista H has four main pages: Map page, Compass page, Altimeter page, and the Main Menu. The eTrex Legend H does not have the Altimeter page. Cycle through these pages by pressing QUIT. The Active Route page appears in the sequence when you are actively navigating a route. The Satellite page appears only at start up.

Each page has an options menu. To view the options menu for a page, press **MENU**.
Satellite Page
This page appears when you turn the unit on and is accessed from the Main Menu thereafter.

Satellite Page Options
- Use With GPS Off/On—enables you to turn the GPS receiver on or off.
- Track Up/North Up—indicates whether satellites are shown with the rings oriented with North toward the top of the display or your current track toward the top of the screen.
- New Location—use if you have moved the unit more than 600 miles (1,000 km).

- GPS Elevation—shows your current elevation.

Map Page
A built-in basemap that includes cities, interstates, state and county highways, exit information, and lake and river outlines is shown on this page. Increased road detail, points of interest and mapping data is added when using optional MapSource detailed mapping data.

Two map operating modes, position mode and pan mode, determine what is shown on the map display.

Position mode pans the map to keep your present location in the
display area. The position marker shows your travel on the Map page.

When you press the **ROCKER**, the eTrex enters pan mode, which moves the map to keep the white arrow (map pointer) within the display area. Add and configure up to four optional data fields at the top of the page to provide a variety of travel and navigational information.

**To show data fields on the Map Page:**
1. Press **MENU > Data Fields**. The Show sub-menu appears.
2. Select the number of data fields you want to show on the Map page, and press the **ROCKER**.

**To change a data field display:**
1. Press **MENU > Change Data Fields**. The first data field is highlighted.
2. Press the **ROCKER**.
3. Select an option.
4. Move to the next field, and repeat.

**Using Additional Map Data**
View listings of nearby restaurants, lodging, shopping centers, attractions and entertainment, and retrieve addresses and phone numbers for any listed location when using optional MapSource data disks.
To review map information:
1. From the Map page, press **MENU > Setup Map**.
2. Select the **Map Setup-information** page. The list of maps stored appears. A check mark means the map is shown on the Map page.

### Changing the Zoom Range
Press the **In** key to decrease the zoom range and show an area with greater detail; press the **Out** key to increase the range to see a larger area with less detail.

The current zoom range setting is shown in the lower-left corner of the Map page. If no further map information is available, “overzoom” appears under the zoom range. When using MapSource maps, “mapsource” appears below the scale.

### Map Orientation
There are two map orientations in the Setup Map option. North Up orients the map like a paper map. Track Up orients the map in the direction of travel.

### Map Page Options
- **Stop (Resume) Navigation**—stops/resumes navigation.
- **Data Fields**—opens the Show sub-menu so you can select the number of data fields to show: **Map Only**, **1 Wide Data Field**, **2 Data Fields**, **2 Wide Data Fields**, **3 Data Fields**, or **4 Data Fields**.
Main Pages

- **Change Data Fields**—allows you to select the type of data in the data fields. This option is available if data fields are selected.

- **Guidance Text**—shows messages on the screen advising you of your next navigation move.

- **Setup Map**—accesses six pages of display options.

- **Measure Distance (Stop Measuring)**—measures the distance from your current location to the map pointer.

- **Turn Declutter On (Off)**—eliminates the display of items that can block road details.

- **Restore Defaults**—returns to factory defaults.

**Guidance Text**
When navigating, guidance text appears above the map. Guidance Text gives directions to a destination.

```
South to US 169
```

**To show guidance text:**
1. Press **MENU > Guidance Text**.
2. Select **Always Show, Never Show**, or **Show When Navigating**.

If you select **Show When Navigating**, a guidance message appears until you select **Stop Navigation**.
Measuring Distance
To measure distance between two points:
1. Press **MENU > Measure Distance**. An on-screen arrow appears at your location with “REF” below it.
2. Move the arrow to the reference point (the starting point you want to measure from), and press the **ROCKER**. A push pin icon marks the starting point.
3. Move the arrow to the point you want to measure. The distance between the two points is shown in the upper-right corner.

Compass Page
The Compass page guides you to your destination with a graphic compass display and a bearing or course pointer.

The rotating compass ring indicates the direction you are heading. The bearing and course pointers indicate the direction...
(bearing to or course of travel) to your destination, relative to your current heading direction. Choose a bearing pointer or course pointer for guidance.

Using the Electronic Compass
Both the Legend H and the Vista H use a GPS data driven compass but only the Vista H has an additional electronic compass.

When you press and hold QUIT on the Vista H unit, the electronic compass turns off and stays off until you press and hold QUIT again.

The electronic compass functions like a magnetic compass when you are stationary. When you are moving and reach a pre-set speed, it uses data from the GPS receiver to maintain your heading. When you stop (after a pre-set time), it again operates like a magnetic compass.

To turn the electronic compass on or off:
1. Press and hold QUIT to turn the electronic compass on or off. The compass icon 🌋 appears in the status bar when the electronic compass is on. When you are not using the electronic compass, turn it off to conserve batteries. When it is turned off, the unit uses the GPS receiver for navigation.
2. Hold the Vista H level to get an accurate electronic compass reading.

To set the speed and time for Compass Auto On and Off:
1. Press **MENU** twice > **Setup**.
2. Select **Heading**.
3. Select **Switch to compass heading when below**.
4. Use the numeric keypad to enter a speed.
5. Select **for more than** to set the time delay from the time options list.

**Calibrating the Electronic Compass**
Calibrate the electronic compass outdoors when you first use the Vista H. To ensure continued accuracy, calibrate after installing new batteries, after moving more than 100 miles (160 km), or experiencing a temperature change greater than 68º F (20º C) from the last calibration. The accuracy of the electronic compass is also adversely affected if the unit is not held level or you are near objects that affect magnetic fields, such as cars or buildings.

To calibrate the electronic compass (Vista H only):
1. While outdoors, hold the Vista H level and do not stand near objects that influence magnetic fields, such as cars, buildings, or overhead power lines.
2. Press **MENU > Calibration**.
3. Select **Start** and follow on-screen directions for holding and turning the unit.

   - A “Just Right,” “Too Fast,” or “Too Slow” message appears notifying you to adjust your turning speed. Hold the unit level while turning.

   - If “Calibration Failed” appears, repeat the process.

   - “Calibration Successful” appears when finished.

4. Press the **ROCKER** to return to the Compass page.

**Compass Page Options**

- **Sight ‘N Go**—navigate to an object within your sight (Vista H only).

- **Stop/Resume Navigation**—turns active navigation for a route or Go To on and off.

- **Course or Bearing Pointer**—toggles between the course pointer and the bearing pointer.

- **Data Fields**—selects the number of data fields that appear on the Compass page.

- **Change Data Fields**—selects the type of data you want to show in the data fields.

- **Calibrate Compass**—accesses the compass Calibration page (Vista H only).

- **Restore Defaults**—returns to factory settings.
Sight ‘N Go Navigation

Sight ‘N Go navigation is available only on the Vista H with electronic compass.

To use Sight ‘N Go to navigate:

1. Press MENU > Sight ‘N Go to start the feature. The compass ring with pointer is in-line with the two white sighting marks, one at the base of the screen and one at the top of the screen.

2. Hold the unit at eye level and line up the two sighting marks with the distant object. Press the ROCKER to lock the direction.

3. Select Set Course.

4. Begin traveling to your destination on a course line using the course pointer as a guide.

OR

Select Project Waypoint.

5. Enter an estimated distance from your current location to establish a projected waypoint location.

6. Select Go To to open the Map page and begin navigation to the projected waypoint. The Compass page shows a bearing pointer for guidance.

Using the Course or Bearing Pointer

The bearing pointer and course pointer are independent of each other. The bearing pointer indicates the direction.
to your destination, and the course pointer indicates your relationship to a course line leading to the destination.

If the bearing pointer arrow is pointing straight up, for example, you are going directly to your destination. If it points any direction other than up, turn toward that direction until the arrow is pointing up and then continue in that direction. The bearing pointer points to the destination.

If you are using the course pointer option, and you drift away from the line of travel from your original location to your destination, the course deviation indicator (an arrow with horizontal dotted line) provides graphic indication of drift (right or left) according to the scale shown on the compass ring and indicated by the dotted line. Move to the right or left to get back on course.
Altimeter Page
The Altimeter page is provided with the Vista H only.

The Altimeter page shows you a profile of elevation changes over distance or time, or a profile of pressure changes over time.

Configure the profile field in the center of the page to show either elevation or ambient pressure plots.

Data fields at the top of the page are user selectable.

Altimeter Page Options
- **View Elevation Plot**—Over Time or Over Distance—view over a set period of time or over a set distance.
- **View Pressure Plot**—Barometer or Ambient Pressure—view a plot of elevation changes that occur over a set distance or view changes in barometric pressure for a set period of time.
Main Pages

- **Zoom Ranges**—set the Zoom Ranges for elevation, distance, or time when you show the View Elevation Plot. Customize the View option displays using the Zoom Ranges option.

- **Change Data Fields**—select the type of data you want to show in the data fields.

- **Reset**—reset the elevation data and the maximum elevation data.

- **Calibrate Altimeter**—if you know the correct elevation for your location, increase accuracy by using the Calibrate Altimeter option.

- **Restore Defaults**—clears recorded data from the page and begin recording new data.

**Plot Over Time or Distance**
These two measurement options (changes over a set period of time or changes over a set distance) apply only to the View Elevation Plot option. View Pressure Plot is measured by time.

**View Pressure or Elevation Plots**
Select the [View Elevation Plot](#) to plot elevation. Select [View Pressure Plot](#) to barometric pressure.
To view elevation or pressure plots:
1. Select the option you want from the Altimeter options menu to show the plot.

2. Adjust the time and distance measurement using the elevation plot Zoom Ranges option.

3. To clear the plot, clear the Track Log.

Adjusting the Zoom Ranges
Set the zoom ranges for elevation, distance, or time when you use the View Elevation Plot.

Zoom Range Selection

To adjust zoom ranges:
1. Select the type of plot you want to show and use the ROCKER to select Zoom Ranges.

2. Move the ROCKER up or down to adjust the vertical distance, and left or right to adjust the time or distance. Press the ROCKER to return.
Main Pages

View Points
Scroll through a recorded elevation or pressure profile to view the elevation or pressure, time of day, and date the point was created.

To use the View Points option:
1. Press **MENU > View Pressure Plot** or **View Elevation Plot** to open the Plot page.
2. Use the **ROCKER** to scroll the cross hairs across the profile. As the cross hairs move across the profile, the status window at the bottom of the page changes to show the date, time, and altitude or pressure for the point.

View Points on Map
View the location of points on the Map page.

To view altitude points on the Map Page:
1. With the Altimeter page open, use the **ROCKER** to move the crosshairs to the point.
2. Press the **ROCKER** to show the point on the map.

Resetting Data
To reset the elevation data and max elevation fields:
1. Press **MENU > Reset**.
2. Select the reset options, and press the **ROCKER** to place a check by an option.
3. Highlight **Apply**, and press the **ROCKER** to reset the data fields. A confirmation message appears.

**Calibrating the Altimeter**
Because the altimeter relies on the barometric pressure to determine the elevation and the pressure at any given elevation can fluctuate, calibrate the altimeter to increase its accuracy.

**To manually calibrate the altimeter:**
1. Press **MENU > Calibrate Altimeter**.

2. At the message “Do You Know The Correct Elevation?” select **Yes**. If you do not know the elevation, select **No** to use the pressure option. If you do not know the pressure, select **No** to use the default GPS elevation.

3. Use the **ROCKER > OK** to enter the new elevation or pressure.

**Trip Computer Page**
The Trip Computer page shows up to nine types of navigation data. Choosing Big Numbers arranges the page in four large data fields.
Trip Computer Page

Each data field is selectable and can contain one of many data information options. When the data field title is selected, press the ROCKER to make a new choice.

Trip Computer Page Options

The option menu allows you to reset the Trip Computer data when you are ready to start a new trip, choose between Big or Small Numbers, and Restore Defaults.

Main Menu

The Main Menu contains settings and features not found on the main pages and sub-menus. The time and date are shown at the bottom of this page. The Main Menu is accessible from any page by pressing MENU twice. To select an item on the Main Menu, highlight the menu item, and press the ROCKER.
Main Pages

**Main Menu**

- **NOTE:** If a page is added to the Main Page sequence, the icon for that page does not appear on the Main Menu.

**Tracks**

For more information, see page 23.

**Routes Page**

For more information, see page 27.

**Setup Menu**

To access the Setup Menu:

- From the Main Menu, select **Setup**.

**System Setup Page**

To access the System Setup page:

- From the Setup Menu, select **System**.

- **GPS**—choose one of the GPS options other than Normal to save battery power.

- **WAAS/EGNOS**—set Enable or Disable WAAS /EGNOS.
Main Pages

- **Battery Type**—set the Battery Type for more accurate battery capacity status.

- **Text Language**—select the text language on the eTrex. Changing the text language does not change the language of user-entered data or map data, such as street names.

- **External Power Lost**—set the unit to turn off if external power is lost.

Use the option menu to restore defaults, or view the version of unit software and the Unit I.D. number.

### Display Setup Page
You can adjust the amount of time that the backlight stays on and set the level of brightness.

**To access the Display Setup page:**
- From the Setup Menu, select **Display**.

- **Backlight Timeout**—choose from Stays On or delays of 15 seconds, 30 seconds, one minute, or two minutes.

- **Backlight Level**—use the slider to adjust the brightness.

- **Contrast**—adjust the difference between the lightest and darkest areas of the screen.
Page Sequence Setup
Use to add, remove, or reorder any of the Main pages.

To move, insert or remove a Main Page:
1. From the Setup Menu select Page Seq.
2. To rearrange a page in the page sequence, select the page. Select Move.
3. To insert a new page, select the page you want it inserted before, press the ROCKER > Insert.

Map Setup Page
Use the Map Setup page to adjust how items are shown on the Map page.

To customize the Map Page display:
1. Press MENU > Setup Map. The top of the page contains icons for each setup page.
2. Use the ROCKER to select a page and to move up and down the feature fields on each page.
3. With a Map Setup feature highlighted, press the ROCKER to list the options for that feature. Each page has a sub-menu of general options. To access this menu, press MENU with the preferred setup page displayed.
Map Setup – General Page
The Map Setup – General page contains the settings for Orientation, Below, Auto Zoom, and Detail.

- **Orientation**—selects how the map is shown. North Up always shows north at the top of the page. Track Up shows your current track toward the top of the page.
- **Below**—sets the map scale at which the Track Up feature displays. All scales above that revert to the North Up map orientation.
- **Auto Zoom**—zooms the map scale to include the beginning and ending points of a route.
- **Detail**—selects the degree of map detail shown.

Map Setup – Tracks Page
Use the Map Setup – Tracks page settings for Saved Tracks, Track Log, Track Points, and Go To Line.
Map Setup - Tracks Page

- **Saved Track**—sets the maximum zoom range at which saved tracks are shown on the map.

- **Track Log**—sets the maximum zoom range at which active track logs are shown.

- **Track Points**—sets the maximum number of track points used to record a track.

- **Go To Line**—selects either a bearing or course line for navigating a track.

Map Setup – Points Page

Use the Map Setup – Points page to set the map scale at which Map Points, User Waypoints, Street Label, and Land Cover appear on the Map page. Select Auto, Off, or from 20 ft to 500 mi (5 m to 800 km).
Main Pages

Map Setup – Text Page
Use the Map Setup – Text page to select the text size for descriptions of map items on the Map page. You can select from Small, Medium, or Large.

Map Setup – Information Page
Use the Map Setup – Information page to view a list of downloaded detailed maps such as topographic and marine charts.

Map Setup – Marine Page
Use the Map Setup – Marine page to customize settings for marine colors, spot soundings, light sectors, and symbol sets.

Highlight a map to show it on the map or turn it off.

Map Setup - Information Page
Press MENU to view options for displaying maps.
Map Setup – Marine Page

- **Marine Colors**—toggles colors on or off.
- **Spot Soundings**—toggles spot soundings on or off.
- **Light Sectors**—select from On, Off, and Auto.
- **Symbol Set**—select the symbol set to use (Auto, GARMIN, NOAA, International).

---

**Geocache Setup**

For more information about geocaching, visit [www.geocaching.com](http://www.geocaching.com).

To setup the Geocache feature:
1. Access the Setup Menu, select **Geocache**.
2. Select the symbol fields if you want to assign other symbols.
3. Select **Yes** or **No** for a calendar entry when a geocache is found.
Main Pages

**Time Setup**

To access the Time Setup page:

- From the Setup Menu, select **Time**.

- **Time Format**—choose from 12-hour or 24-hour time format.

- **Time Zone**—set to one of the eight US Time Zones or 24 International Time Zones.

- **UTC Offset**—When the Time Zone is set to Other, specifies the offset from UTC (Universal Time Coordinated).

- **Daylight Saving Time**—On, Off or Auto.

**Units Setup**

To access the Units Setup page:

- From the Setup Menu, select **Units**.

- **Position Format**—sets the coordinate system in which a location is shown.

- **Map Datum**—sets the description for geographic location, for mapping and navigation, and is not an actual map in the unit.

- **Distance/Speed**—sets the unit of measurement to show your speed and distance.

- **Elevation (Vert. Speed)**—sets the unit of measurement (Feet (ft/min), Meters (m/min), or Meters (m/sec)).
• **Depth**—select the unit of measurement (Feet, Fathoms, or Meters).

• **Pressure**—sets the unit of measurement (Inches, Millibars, or Hectopascals) to show pressure.

**Heading Setup Page**
You can select the type of heading mode.

To access the **Heading Setup page**:
  From the Setup Menu, select **Heading**.

• **Display**—choose from Cardinal Letters, Degrees or Mils.

• **North Reference**—choose from True, Magnetic, Grid or User options.

The following two features apply to the Vista H only:

• **Switch to compass heading when below**—enter the selected speed for the unit to switch from using GPS to using the electronic compass for guidance.

• **for more than**...—enter a time limit to switch to the compass.

**Calibration Setup Page**
For the Vista H only. Refer to page 37.
Main Pages

Altimeter Setup

To setup the Altimeter:
1. From Setup Menu, select Altimeter.
2. Select the Auto Calibration field to select on or off. When on, elevation is corrected by GPS.
3. Select the Barometer Mode field to specify “Variable Elevation” (used when you are moving) or “Fixed Elevation” (used when stationary).

Welcome Page Setup

Insert a message when you turn the unit on.

To setup the Welcome Page:
1. From the Setup Menu, select Welcome Message.
2. Use the on-screen keyboard to begin entering your message in the Welcome Message field.

Jumpmaster Setup

Jumpmaster is designed for experienced skydivers and is available for the Vista H only. Refer to the Garmin Web site at www.garmin.com/products/etrexVistaH. Click Manuals and then select the Using Jumpmaster manual.

Calendar

To access the Calendar:
From the Main Menu, select Calendar.
Calculator

To access the Calculator:
From the Main Menu, select "Calculator".

Stopwatch

To access the Stopwatch:
From the Main Menu, select "Stopwatch".

Sun and Moon

To access the Sun and Moon Page:
From the Main Menu, select "Sun & Moon" to view the Sunrise/Sunset and Moon phases.

Hunt & Fish

To show hunting and fishing predictions for a specified date and location:
1. From the Main Menu, select "Hunt & Fish" to view the predictions for a different date. Select "Date" to open the on-screen keypad.
2. To view the predictions for a location, select the "Location" field.

Games Menu

To open the Games Menu:
From the Main Menu, select "Games".
Appendix

Specifications

Physical
Size: \( W \times H \times D: 2.0 \times 4.4 \times 1.2 \) in. \((5.1 \times 11.2 \times 3.0 \text{ cm})\)

Weight: 5.3 ounces \((150 \text{ g})\) with batteries installed.

Display: \( W \times H: 1.1 \times 2.1 \) in. \((2.8 \times 5.4 \text{ cm})\), 4-level, gray scale \((160 \times 288 \text{ pixels})\) backlit LCD.

Case: Rugged, fully gasketed, water resistant, IEC-529, IPX7

Temp: from \(5^\circ\text{F} \) to \(158^\circ\text{F} \) 
(from \(-15^\circ\text{C} \) to \(70^\circ\text{C}\))*

*The temperature rating of the eTrex may exceed the usable range of some batteries. Some batteries can rupture at high temperatures.

Performance

Receiver: WAAS/EGNOS enabled, high-sensitivity

Acquisition Times: (approximately)
Hot start - 3 seconds
Warm start - 33 seconds
Cold start - 39 seconds

Update Rate: 1/second, continuous

Antenna: Built-in patch

Compass: (Vista H only)
Accuracy; \(\pm 5\) degrees
Resolution; \(\pm 1\) degree, user calibrated

Altimeter: (Vista H only)
Accuracy; \(\pm 10\) ft. \((3.3\text{ m})\)
Resolution; 1 ft. \((0.3\text{ m})\), user calibrated

Power
Source: Two 1.5 volt AA batteries, 12 Vdc Adapter, or USB Cable

Battery Life: Up to 18 hours
Accuracy

GPS:  <33 ft. (10 m) 95% typical*

*Subject to accuracy degradation to
100m 2DRMS under the U.S. DoD
imposed Selective Availability (SA)
Program when activated.

DGPS:  10 ft. (3.3 m) 95% typical*

*Wide Area Augmentation System
(WAAS) accuracy in North America.

Velocity:  0.1 meter/sec steady state

Interfaces: Garmin Proprietary (USB)

Data Storage Life:  Indefinite; no
memory battery required

Map Storage:  24 MB
Appendix

Connecting Your eTrex to a Computer
You can connect the eTrex to your computer using the supplied USB cable.

Before transferring data to the eTrex, install USB drivers from www.garmin.com. Click on Support > Updates and Downloads > Additional Software > USB Drivers.

To connect your eTrex to your computer:
1. Lift the weather cap on the top of the eTrex.
2. Insert the smaller connector on the USB cable into the USB connector port.
3. Connect the other end of the cable to a USB port on your computer.

Transferring Tracks, Routes, or Waypoints
Tracks, routes, and waypoints (including geocache sites) can be transferred between your eTrex and optional MapSource maps.

To transfer tracks, routes, or waypoints to and from MapSource:
1. Connect the eTrex to the computer with the USB cable.
2. Turn the eTrex on.
3. Open MapSource on your computer.
4. Click Receive From Device or Send To Device on the MapSource Transfer menu.
Caring for the eTrex

Cleaning the Case
Clean the outer casing (except for the screen) using a cloth dampened with a mild detergent solution, and then wipe it dry. Avoid cleaners that may damage the plastic components.

Cleaning the Screen
Clean the eTrex screen using a soft, clean, lint-free cloth. Use water, isopropyl alcohol, or eyeglass lens cleaner. Apply the liquid to the cloth, and then gently wipe the screen with the moistened cloth.
Appendix

Software License Agreement
BY USING THE eTrex Vista H or eTrex Legend H, YOU AGREE TO BE BOUND BY THE TERMS AND CONDITIONS OF THE FOLLOWING SOFTWARE LICENSE AGREEMENT. PLEASE READ THIS AGREEMENT CAREFULLY.

Garmin grants you a limited license to use the software embedded in this device (the “Software”) in binary executable form in the normal operation of the product. Title, ownership rights, and intellectual property rights in and to the Software remain in Garmin.

You acknowledge that the Software is the property of Garmin and is protected under the United States of America copyright laws and international copyright treaties. You further acknowledge that the structure, organization, and code of the Software are valuable trade secrets of Garmin and that the Software in source code form remains a valuable trade secret of Garmin. You agree not to decompile, disassemble, modify, reverse assemble, reverse engineer, or reduce to human readable form the Software or any part thereof or create any derivative works based on the Software. You agree not to export or re-export the Software to any country in violation of the export control laws of the United States of America.

Declaration of Conformity
Hereby, Garmin declares that this eTrex Vista H or eTrex Legend H are in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

To view the full Declaration of Conformity, see the Garmin Web site for your Garmin product:
