Thank you for purchasing a Panasonic Projector.

Before operating this product, please read the instructions carefully, and save this manual for future use.

Before using your projector, be sure to read “Precautions with regard to safety” (pages 6 - 10).
Important Information

Dear Panasonic Customer:

This instruction booklet provides all the necessary operating information that you might require. We hope it will help you to get the most out of your new product, and that you will be pleased with your Panasonic LCD projector. The serial number of your product may be found on its bottom. You should note it in the space provided below and retain this booklet in case service is required.

Model number: PT-LB90NTEA/PT-LB90EA/PT-LB78VEA/PT-LB75VEA

Serial number:

**WARNING:**  THIS APPARATUS MUST BE EARTHED.

**WARNING:**  To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or moisture.

Machine Noise Information Ordinance 3. GSGV, January 18, 1991: The sound pressure level at the operator position is equal or less than 70 dB (A) according to ISO7779.

**WARNING:**
1. Remove the plug from the mains socket when this unit is not in use for a prolonged period of time.
2. To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3. Do not remove the earthing pin on the mains plug. This apparatus is equipped with a three prong earthing-type mains plug. This plug will only fit an earthing-type mains socket. This is a safety feature. If you are unable to insert the plug into the mains socket, contact an electrician. Do not defeat the purpose of the earthing plug.

Information for Users on Collection and Disposal of Old Equipment and used Batteries

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries should not be mixed with general household waste.

For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC and 2006/66/EC.

By disposing of these products and batteries correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products and batteries, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):

This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

Environment care information for users in China

This symbol is only valid in China.
**CAUTION:** To assure continued compliance, follow the attached installation instructions, which includes using the provided mains lead and shielded interface cables when connecting to computer or peripheral device. Any unauthorised changes or modifications to this equipment will void the user’s authority to operate.
User logo display function

You can project your unique image such as your company’s logo when projection starts. (page 36)

FUNCTION button

You can assign almost all the items on the on-screen menu to the FUNCTION button of the remote control and control panel. You can display the frequently used functions by pressing the FUNCTION button. (page 26, 41)

Standby power reduction

The standby power is highly reduced from the previous model.
Approx. 4.0 W (PT-LB80NTEA)
Approx. 0.9 W (PT-LB90NTEA) (Standby mode: In “ECO”)

Quick steps

For details, see the corresponding pages.

1. Set up your projector. (page 15)

2. Connect with other devices. (page 17)

3. Connect the mains lead. (page 19)

4. Switch on the projector. (page 21)

5. Select the input signal. (page 23)

6. Adjust the image. (page 23)

WARNING

The mains socket or the circuit breaker shall be installed near the equipment and shall be easily accessible when problems occur. If the followings problems occur, cut off the power supply immediately.

Continued use of the projector in these conditions will result in fire or electric shock.

- If foreign objects or water get inside the projector, cut off the power supply.
- If the projector is dropped or the cabinet is broken, cut off the power supply.
- If you notice smoke, strange smells or noise coming from the projector, cut off the power supply.

Please contact an Authorised Service Centre for repairs, and do not attempt to repair the projector yourself.

During a thunderstorm, do not touch the projector or the cable. Electric shocks can result.

Do not do anything that might damage the mains lead or the mains plug.

If the mains lead is used while damaged, electric shocks, short-circuits or fire will result.

- Do not damage the mains lead, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.
- Ask an Authorised Service Centre to carry out any repairs to the mains lead that might be necessary.

Insert the mains plug securely into the mains socket.

If the plug is not inserted correctly, electric shocks or overheating will result.

- Do not use anything other than the provided mains lead.
- Do not use plugs which are damaged or mains sockets which are coming loose from the wall.

Clean the mains plug regularly to prevent it from becoming covered in dust.

Failure to observe this will cause a fire.

- If dust builds up on the mains plug, the resulting humidity can damage the insulation.
- If not using the projector for an extended period of time, pull the mains plug out from the mains socket. Pull the mains plug out from the mains socket and wipe it with a dry cloth regularly.

Do not handle the mains plug with wet hands.

Failure to observe this will result in electric shocks.

Do not overload the mains socket.

If the power supply is overloaded (ex., by using too many adapters), overheating may occur and fire will result.

ON USE/INSTALLATION

Do not place liquid containers on top of the projector.

If water spills onto the projector or gets inside it, fire or electric shocks will result.

- If any water gets inside the projector, contact an Authorised Service Centre.

Do not place the projector on soft materials such as carpets or sponge mats.

Doing so will cause the projector to overheat, which can cause burns, fire or damage to the projector.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam, ex a bathroom.

Using the projector under such conditions will result in fire, electric shocks or components deterioration. Components deterioration (such as ceiling mount brackets) may cause the projector which is mounted on the ceiling to fall down.

Do not install this projector in a place which is not strong enough to take the full weight of the projector or on top of a surface which is sloped or unstable.

Failure to observe this will cause projector to fall down or tip over the projector, and severe injury or damage could result.

Do not place another projector or other heavy objects on top of the projector.

Failure to observe this will cause the projector to become unbalanced and fall, which could result in damage or injury. The projector will be damaged or deformed.

Installation work (such as ceiling suspension) should only be carried out by a qualified technician.

If installation is not carried out and secured correctly it can cause injury or accidents, such as electric shocks.

- Do not use anything other than an Authorised ceiling mount bracket.

Do not cover the air inlet port or the air outlet port.

Doing so will cause the projector to overheat, which can cause fire or damage to the projector.

- Do not place the projector in narrow, badly ventilated places such as closets or bookshelves.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

Do not place your hands or other objects close to the air outlet port.

Doing so will cause burns or damage your hands or other objects.

- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port.
Precautions with regard to safety

Do not look into or touch the lights emitted from the lens while the projector is being used.
Doing so can cause burns or loss of sight.
- Strong light is emitted from the projector’s lens. Do not look or place your hands directly into this light.
- Be especially careful not to let young children look into the lens. In addition, turn off the power and disconnect the mains plug when you are away from the projector.

Do not insert any foreign objects into the projector.
Doing so will cause fire or electric shocks.
- Do not insert any metal objects or flammable objects into the projector or drop them onto the projector.

Never attempt to remodel or disassemble the projector.
High voltages can cause fire or electric shocks.
For any inspection, adjustment and repair work, please contact an Authorised Service Centre.

ACCESSORIES

Do not use or handle the batteries improperly, and refer to the following.
Failure to observe this will cause burns, batteries to leak, overheat, explode or catch fire.
- Do not use unspecified batteries.
- Use manganese batteries or alkaline batteries but not rechargeable batteries.
- Do not dissemble dry cell batteries.
- Do not heat the batteries or place them into water or fire.
- Do not allow the + and – terminals of the batteries to come into contact with metallic objects such as necklaces or hairpins.
- Do not store batteries together with metallic objects.
- Store the batteries in a plastic bag and keep them away from metallic objects.
- Make sure the polarities (+ and –) are correct when inserting the batteries.
- Do not use a new battery together with an old battery or mix different types of batteries.
- Do not use batteries with the outer cover peeling away or removed.
- Remove the empty batteries from the remote control at once.
- Insulate the battery using tape or something similar before disposal.

Do not allow children to reach the batteries.
- The battery can cause death by suffocation if swallowed.
- If swallowed, seek medical advice immediately.

If the battery fluid leaks, do not touch it with bare hands, and take the following measures if necessary.
- Battery fluid on your skin or clothing could result in skin inflammation or injury. Rinse with clean water and seek medical advice immediately.
- Battery fluid coming in contact with your eyes could result in loss of sight. In this case, do not rub your eyes. Rinse with clean water and seek medical advice immediately.

Do not disassemble the lamp unit.
If the lamp breaks, it could cause injury.

Lamp replacement
The lamp has high internal pressure. If improperly handled, an explosion and severe injury or accidents will result.
- Replacement of the lamp should be carried out by a qualified technician.
- The lamp can easily explode if struck against hard objects or dropped.
- Before replacing the lamp, be sure to disconnect the mains plug from the mains socket. Electric shocks or explosions can result if this is not done.
- When replacing the lamp, allow it to cool for at least one hour before handling it otherwise it can cause burns.

Do not allow infants or pets to touch the remote control unit.
- Keep the remote control unit out of the reach of infants and pets after using it.

CAUTION

POWER

When disconnecting the mains lead, hold the plug, not the lead.
If the mains lead itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks will result.

When not using the projector for an extended period of time, disconnect the mains plug from the mains socket and remove the batteries from the remote control.

Disconnect the mains plug from the mains socket before carrying out any cleaning.
Electric shocks can result if this is not done.
Precautions with regard to safety

■ON USE/INSTALLATION

Do not put your weight on this projector.
You could fall or the projector could break, and injury will result.
• Be especially careful not to let young children stand or sit on the projector.

Do not place the projector in extremely hot locations.
Doing so will cause the outer casing or internal components to deteriorate, or result in fire.
• Take particular care in locations exposed to direct sunlight or near stoves.

Always disconnect all cables before moving the projector.
Moving the projector with cables still attached can damage the cables, which will cause fire or electric shocks to occur.

■ACCESSORIES

Do not use the old lamp unit.
If used it could cause lamp explosion.

If the lamp has broken, ventilate the room immediately. Do not touch or bring your face close to the broken pieces.
Failure to observe this will cause the user to absorb the gas which was released when the lamp broke and which contains nearly the same amount of mercury as fluorescent lamps, and the broken pieces will cause injury.
• If you believe that you have absorbed the gas or that the gas has got into your eyes or mouth, seek medical advice immediately.
• Ask your dealer about replacing the lamp unit and check the inside of the projector.

Do not use projectors with the adjustable feet or lens cover removed.
If this not observed, the sets will not operate correctly or accidents will result.

■Cautions when transporting

When transporting the projector, the adjuster legs must be housed and do not hold them. Please securely hold only its bottom and none of its other parts or surfaces as this will result in malfunctions.

When transporting, keep the projector in the provided carrying bag.
• Face the lens of the projector in an upward direction and put it gently into the carrying bag.
• Do not put anything other than the projector and its accessories in the carrying bag.

■Cautions when installing

■Do not use under the following conditions.
  • Do not set up the projector outdoors.
The projector is designed for indoor use only.
  • Avoid setting up in places which are subject to vibration or shocks.
If the projector is installed in a place where vibrations are transmitted or mounted in a car or a vessel, vibrations or impacts will result in damage to the internal parts, causing failure. Install the product in a place free from vibrations and impacts.
  • Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner or lighting equipment.
Failure to observe this will result in malfunctions or the lamp life will be shortened.
   See “TEMP indicator” on page 46.
  • Avoid setting up in places which are near high-voltage power lines or near motors.
The product will be exposed to interference if it is installed in the vicinity of high-voltage electrical power lines or power sources.
  • Do not install the projector at elevations higher than 2 700 m (8 858 ft) above sea level.
If using this projector at high elevations 1 400 - 2 700 m (4 593 - 8 858 ft) above sea level, set the HIGH ALTITUDE MODE to ON.
Failure to observe this will result in malfunctions or the lamp life or life of other components will be shortened.

Be sure to ask a specialised technician when installing the product to a ceiling.
If the product is to be installed hanging from the ceiling, purchase an optional hanging attachment (Model No. ET-PKB80). Please call a specialised technician or contact an Authorised Service Centre for installation.

■Lens Focus

Do not adjust the lens focus in the initial period after switching the projector on. The high clarity projector lens is thermally affected by the light from the light source, making the focus unstable in the period just after switching on. Please allow a warm-up time of at least 30 minutes before adjusting the lens focus.
Precautions with regard to safety

Cautions on use

■ In order to get the picture quality
Draw curtains or blinds over windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen. Depending on where the projector is used, air exhaust vents or the warm air from air conditioning can cause a shimmering effect on the screen. For this reason, take care not to shield the air exhaust vents and consider the direction of the air flowing from air conditioning.

■ Do not touch the surface of the projector lens cover with your bare hand.
If the surface of the lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen.

■ Do not move the projector while it is operating or subject it to vibration or impact.
The service life of its internal components will be shortened.

■ The projector has a high pressure mercury lamp that is characterised as follows:
- The brightness of the lamp will decrease over time.
- The lamp may explode or shorten the lamp life by shocks or chipping damage.
- In rare cases, it may burst shortly after the first use.
- The possibility of its bursting increases when the lamp is used beyond the replacement time.
- If the lamp bursts, gas inside the lamp is released in the form of smoke.
- The life of a mercury lamp varies according to the individual difference or conditions of use.
- In particular, turning the power on and off frequently and/or repeatedly as well as continuous use for 10 hours will greatly affect the life cycle. Provide a lamp for replacement in advance.

■ Connection to external device
When connecting the projector to a computer or external device, use the mains lead supplied with the corresponding device and a commercially available shielded interface cable.

■ Optical components
It may be necessary to replace the optical components such as Liquid crystal panels and Polarizing plates in less than 1 year if using the projector in a high temperature environment or in a very dusty, oily smoke or tobacco smoke environment. For more details, please contact your dealer.

■ Liquid crystal panel
The Liquid crystal panels are precision-made. Note that in rare cases, pixels of high precision could be missing or always lit, but this is not a malfunction. Do not project the same image for long periods of time, as this may remain as an afterimage on the liquid crystal panel. Display the white screen test pattern for more than an hour to remove it. See “TEST PATTERN” on page 42.

Security

■ Take safety measures against following incidents.
- Personal information being leaked via this product.
- Unauthorised operation of this product by a malicious third party.
- Interfering or stopping of this product by a malicious third party.

■ Security instruction
- The connecting network must be secured by firewall or others.
- Change your password regularly.
- Do not use a password that is simple to guess.
- Panasonic and its affiliate companies would never directly inquire about your password.
- Do not share your password with the general public.
- Set a password, and place restrictions on the users who can log in.

Cleaning and maintenance

■ Ask an Authorised Service Centre to clean the inside of the projector at least once a year.
If dust is left to build up inside the projector without being cleaned out, it can result in fire or problems with operation. It is a good idea to clean the inside of the projector before the season when humid weather arrives.
Ask your nearest Authorised Service Centre to clean the projector when required.
Please discuss with the Authorised Service Centre regarding cleaning costs.

Disposal

When discarding this product, please contact your local authorities or dealer and ask for the correct method of disposal.
## Accessories

Make sure the following accessories are provided with your projector.

<table>
<thead>

Display the frozen image while the display of subsequent images continues.
([page 25])

The **COMPUTER SEARCH** button is only for PT-LB90NTEA.
(See **CD-ROM contents.**)

Assign a useful function for a shortcut.
([page 26, 41])

Control to adjust the volume of the speaker.
([page 25])

#### Note

- Do not drop the remote control.
- Avoid contact with liquids or moisture.
- Do not attempt to modify or disassemble the remote control.
- Do not mix old and new batteries or batteries of different types.
  Use only manganese batteries or alkaline batteries with the remote control.
- Do not swing the strapped remote control.

#### Remarks

- Do not let strong light shine onto the signal receptor.
  The remote control may malfunction under strong light such as fluorescent.
- You can operate the projector with the remote control within the remote range of 15 m (49'2''), approximately ±30 ° vertically and horizontally.
- If there are any obstacles between the remote control emitter and the remote control signal receptor, the remote control may not operate correctly.
  The operating range may differ due to the screen material, and this function may not be effective with a translucent screen.
Setting up

Screen size and throw distance

You can adjust the projection size with 1.2x zoom lens. Calculate and define the throw distance as follows.

You can calculate more detailed screen dimensions from the screen diagonal. The results below are approximate and may differ slightly from the actual measurements.

If the projection size is SD,

<table>
<thead>
<tr>
<th>Projection size</th>

</tbody>
</table>

You can adjust the projection size with 1.2× zoom lens. Calculate and define the throw distance as follows.

You can adjust the projection size with 1.2× zoom lens. Calculate and define the throw distance as follows.

Note

- For the best quality of the projection image, install a screen where sunlight or room light does not shine directly onto the screen. Close window shades or curtains to block the light and turn off the lamps.
- Do not use the projector at a raised or a horizontally tilted position. Doing so may cause malfunction of the projector.
  - You can tilt the projector body approximately ±30 ° vertically and ±10 ° horizontally.
  - Overtilting may result in shortening the component’s life.
- Do not cover the air outlet port and air intake ports or place anything within 50 cm (20") of them as this may cause damage or injury.
Setting up

Projection method

You can use the projector with any of the following 4 projection methods. To set the desired method in the projector, see “INSTALLATION” on page 39.

### Setting on a desk/floor and projecting from front

- **Menu Method**: INSTALLATION FRONT/DESK

### Setting on a desk/floor and projecting from rear (Using translucent screen)

- **Menu Method**: INSTALLATION REAR/DESK

### Mounting in the ceiling and projecting from front

- **Menu Method**: INSTALLATION FRONT/CEILING

### Mounting in the ceiling and projecting from rear (Using translucent screen)

- **Menu Method**: INSTALLATION REAR/CEILING

**Remarks**

- When mounting the projector in the ceiling, the optional ceiling mount bracket (ET-PKB80) is required.

**Front leg adjusters and throwing angle**

You can adjust the projection angle in the vertical direction by pressing the leg adjuster buttons. (page 23)

**Note**

- Heated air comes out of the air exhaust port. Do not touch the air exhaust port directly.
- If keystone distortion occurs, see “KEYSTONE” on page 32.
Connections

Before connecting to the projector

- Read and follow the operating instructions of each peripheral device.
- The peripheral devices must be turned off.
- One RGB cable is provided with the projector. If necessary, prepare commercial connecting cables that match with the projector and each peripheral device terminal.
- If the input signal is affected by signal jitter, the projected image may have poor image quality and timebase correction is effective.
- Confirm the type of video signals, see “List of compatible signals”. (page 52)

Connecting example: AV equipment

Remarks

- When you connect more than one AV equipment, switch the audio connection manually.
- Various connecting cables are not provided with the projector. If necessary, prepare commercial connecting cables that match with the projector and each peripheral device terminal.
Connections

Connecting example: Computers

Note
- When connecting the RGB signal cable, be sure to securely tighten the fixing screws on the D-Sub (15-pin) mains socket.

Remarks
- For the network connection between the projector and computers, see the CD-ROM contents provided. (PT-LB90NTEA only)
- When you connect more than one computer, switch the computer connection manually.
- One RGB cable is provided with the projector. If necessary, prepare commercial connecting cables that match with the projector and each peripheral device terminals.
Switching the projector on/off

Mains lead

Be sure to fix the mains lead to the projector with the provided “Power cord secure lock” to prevent the mains lead from coming off.
Connect the provided mains lead securely.
For details, see “Precautions with regard to safety”. (pages 6 - 10)

■ Connecting

1) Make sure the shape of the mains plug and the AC IN terminal on the back of the projector match, then push the plug all the way in.

2) Align the side of the power cord secure lock with the side guide rail of the AC IN terminal of the projector and slide it in.

3) Place the latch to the latch catcher and press until it clicks.

4) Connect the mains lead to a mains socket.

■ Disconnecting

1) Unplug the mains lead from the mains socket.

2) Depress the latch and slide the cover off.

3) Slide the power cord secure lock up along the side guide rail and remove.

4) Hold the plug and unplug the mains lead from the AC IN terminal on the back of the projector.

■ Direct power off function

You can switch off the electric power supply any time by unplugging the mains plug from the mains socket or by switching off the main power. The internal lamp cooling fan keeps operating by the internal power supply, and stops automatically when cooled enough.

Note

Do not put the projector into the carrying bag with the POWER indicator lit.

■ Direct power on function

If INITIAL START UP in the PROJECTOR SETUP menu is set to ON, connect the mains lead to a mains socket and the projection will start even when the control panel is disabled or the POWER button is locked. (page 39)
Switching the projector on/off

POWER and POWER LOCK indicators

The POWER indicator informs you of the status of the power and the POWER LOCK indicator shows the status of the RELEASE button. When the TEMP indicators are flashing, the POWER and POWER LOCK indicators will light red and you cannot switch the projector on.

![Diagram of projector with POWER and POWER LOCK indicators labeled]

### POWER LOCK indicator status

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>
</tr>
</thead>
</table>
| No illumination or flashing | No power is supplied.  
|                   | ● The RELEASE button is pressed and the POWER button is unlocked while the power is on. |
| Red Lit          | The POWER button is locked.                                             |
| Red Flashing     | Pressing the locked POWER button.                                       |

### POWER indicator status

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>No illumination or flashing</td>
<td>No power is supplied and the internal cooling fan is not operating.</td>
</tr>
</tbody>
</table>
| Red Lit          | The power is turned off (when STANDBY MODE is set to ECO).  
|                  | If the POWER button is pressed, projection starts.                   |
| Red Flashing     | The power is turned off (when STANDBY MODE is set to NORMAL).        |
| Green Flashing   | The power is on and preparing for projection.                         |
| Green Lit        | The projector is projecting.                                          |
| Orange Lit       | No power supply and the internal fan is cooling the lamp by internal power supply. |
| Orange Flashing  | The power is switched on again while cooling the lamp and recovering to the projection mode. Recovery may take a while. |

**Remarks**

- When the power is turned off, the internal fan is cooling the lamp by internal power supply.
- The power is switched on again while cooling the lamp and recovering to the projection mode. Recovery may take a while.
- Even while the power is turned off (when STANDBY MODE is set to ECO, the POWER indicator is lit in red), power of about 0.9 W is consumed.
Switching on the projector

Before switching on the projector, make sure the mains lead and all the other devices are connected correctly. (page 17)

1) Connect the mains lead. (page 19)
   The POWER LOCK indicator and POWER indicator light in red.

2) Press the RELEASE button to unlock the POWER button.
   The POWER LOCK indicator goes off.
   • When operating with the remote control, you do not need to press the RELEASE button.

3) Press the POWER button.
   The POWER button beeps once.
   • You can turn ON or OFF the beeping sound that occurs when you press the POWER button by menu setting. (page 41)
   • The POWER indicator flashes in green several times, then the POWER indicator lights up and the STARTUP LOGO is displayed. See “STARTUP LOGO” in the “DISPLAY OPTION” menu. (page 36)

Note

• Operating the control panel buttons with covered hand, such as plastered or gloved, may result in operating errors.

Remarks

• Confirm that CONTROL PANEL (when operating with the projector body) or REMOTE CONTROLLER (when operating with the remote control) under CONTROL DEVICE SETUP in the SECURITY menu is set to ENABLE. (page 44)

• The projector does not operate when the POWER button of the projector body is pressed while it is locked.

• If the POWER button is not being pressed in 10 seconds after the RELEASE button is pressed, the POWER LOCK indicator lights in red and the POWER button remains locked. Press the RELEASE button again to unlock.

• When starting up the projector, some small rattling or tinkling sound may be heard. Those are normal and will not affect the performance of the projector.

• When the internal cooling fan is operating, some operational sound may be heard. The loudness of the operational sound depends on the external temperature.

• If INITIAL START UP in the PROJECTOR SETUP menu is set to ON, the projector starts projecting when the mains lead is connected to a mains socket. (page 39)

• If the projector is switched on again while the internal cooling fan is still operating by the internal power supply, the display may flicker for the characteristics of the lamp. Those are normal and will not affect the performance of the projector.
Switching the projector on/off

Switching off the projector

When operating the projector, check the status of the **POWER** indicator. (page 20)

1) **Press the POWER button.**
   - The confirmation screen will be displayed.
   - Without any operation for 10 seconds or press any button other than the **POWER** button, the confirmation screen will go off and return to the projection.

2) **Press the POWER button again.**
   - The lamp goes off, the operational sound (beep) sounds, and projection stops.
   - The cooling fan continues its rotation and **POWER** indicator lights in orange. Wait until the **POWER LOCK** indicator and **POWER** indicator turn into red.
   - If STANDBY MODE is set to NORMAL, the **POWER** indicator flashes in red. (page 40)
   - You can set to ON or OFF the beeping sound that occurs when the **POWER** button is in operation in AUDIO Setting. (page 41)

3) **After the POWER LOCK indicator and POWER indicator light in red, disconnect the mains plug from the mains socket.** (page 19)
   - For urgency, you may disconnect the mains plug immediately since the DIRECT POWER OFF function is installed.

**Remarks**

- Confirm that CONTROL PANEL (when operating with the projector body) or REMOTE CONTROLLER (when operating with the remote control) under CONTROL DEVICE SETUP in the SECURITY menu is set to ENABLE. (page 44)
- You can switch off the power by pressing the **POWER** button for 0.5 seconds or more.
Projecting an image

Confirm the connections of the peripheral devices (page 17, 18) and mains lead (page 19). Switch on the power (page 21) and the projector starts projecting. Select the input signal and adjust the image.

Selecting the input signal

1) Switch on the connected devices.
When playing a connected DVD player, if SIGNAL SEARCH in the DISPLAY OPTION menu is set to ON, the input signal is detected and projected automatically when the projector is switched on. (page 37)
- Set the INPUT GUIDE under the ON-SCREEN DISPLAY in the DISPLAY OPTION menu to DETAILED. If the projector cannot detect any input signal, the Computer connection guidance will display. (page 36)

2) Select an input signal.
The image selected with the INPUT SELECT button is projected. (page 24)

Note
- Change the setting of the PICTURE menu according to the connected device and DVD, video tape, etc., to be played. (page 31)
- Confirm the aspect ratio of the screen and image. Select the optimum aspect ratio. (page 33)

Positioning the image

When setting up the projector for the first time or setting up at a new place, you must perform the following operations.

1) Adjust the vertical angle of the projector.
- Place the projector at the right angle from the screen.
- Press the adjuster buttons and adjust the vertical projection angle. Then, adjust the projected image to the centre of the screen.

2) Adjust the projection size and focus.
- Remove the Zoom-Focus ring cover (page 12) and turn the zoom and focus rings to adjust the projected image. After adjusting, be sure to install the Zoom-Focus ring cover to protect from dust.

Remarks
- When you adjust the zoom after adjusting the focus, you may need to adjust the focus of the image again.
- If keystone distortion occurs, see “KEYSTONE”. (page 32)
Capturing an image

You can freeze the projected image and stop the sound temporarily, regardless of the playing condition of the connected device.

Press the FREEZE button.

Press the FREEZE button again to escape.

Stopping the projection temporarily

You can stop the projection and audio sound through the projector temporarily.

Press the AV MUTE button.

Press the AV MUTE button again to escape.

Switching the input signal

You can switch the input signal corresponding to the computer to be projected.

Press the COMPUTER button.

Press the COMPUTER button to cycle through the options.

If "INPUT GUIDE" under the ON-SCREEN DISPLAY in the DISPLAY OPTION menu is set to DETAILED (page 36), you can confirm the selected input terminal in the graphical input terminal guide at the upper right of the screen. (Highlighted in yellow is the selected terminal.)

You can change the input with ▲▼◄► buttons. It may take some time to change the image after the input signal is switched.

Note

- Input a compatible signal shown in the "List of compatible signals". (page 52)

Remarks

- For the input terminals, see "Connections". (page 17)
- If no operation is performed, the input guide disappears automatically.
- If the INPUT SELECT button on the control panel is pressed, the input is switched in the following order. (page 12)

*1: PT-LB90NTEA only
Setting up the image position automatically

When a RGB signal is input, the projector adjusts the SHIFT, DOT CLOCK and CLOCK PHASE automatically.

Press [SETUP] button.

Remarks
- The SIGNAL SEARCH operation is also performed. (When SIGNAL SEARCH is set to ON) (page 37)
- If the dot clock frequency is 108 MHz or higher, DOT CLOCK and CLOCK PHASE are not effective. (page 32)
- If the projected image is too dark or blurred around the edge, AUTO SETUP may stop the processing before completing the adjustment and return to the previous setting. Project a much clearer or lighter image and try again.

Resetting to the factory default settings

You can reset most of the customised settings to the factory default settings by pressing the DEFAULT button of the remote control.

Press [DEFAULT] button.

Remarks
- For details, see “Menu Navigation - Navigating through the MENU - Resetting to the factory default settings”. (page 27)

Controlling the volume of the speaker

You can control the volume of the built-in speakers and output audio sound.

Press [VOLUME] button.

- + button: increases the volume
- – button: decreases the volume

Projecting an image in INDEX-WINDOW mode

You can project an image split in 2 windows as an INDEX WINDOW. One is frozen and stored in memory, and displayed on the screen’s left side while displaying subsequent image continues on the right.

Press [INDEX-WINDOW] button.

Remarks
- The aspect ratio of the image is changed and becomes vertically elongated.
- If you change the window size, the aspect ratio of the image is changed. (page 33)
- While in INDEX-WINDOW mode, press the ENTER button to capture a new image and the frozen image window will be updated in a moment.
- When capturing a quick moving picture, perform several times to get a stable picture.
Remote control operation

Enlarging the image

You can enlarge the projected image down to a centred area for emphasizing within the range of 1× to 2×.

Press the button.

Press the RETURN button to escape.

Button functions in digital zoom mode

+ button: zooms in
- button: zooms out

Press "-" Press "+

Press ▲▼◄► to shift the centre point.

Remarks

- When the COMPUTER signal is projected, the enlargement range will be changed to 1× to 3×.
- When FRAME LOCK in the POSITION menu is set to ON, the enlargement range is 1× to 2×. However, the enlargement range is 1× to 3× if FRAME LOCK is set to OFF. (page 34)
- When the input signal is changed while the DIGITAL ZOOM is activated, the DIGITAL ZOOM mode will be cancelled.
- While the DIGITAL ZOOM is activated, the AUTO SETUP, FREEZE, DEFAULT, INDEX-WINDOW and FUNCTION (except when AV MUTE is assigned) buttons are not available.

Using an assigned function

You can select a useful function from the list and assign it to the FUNCTION button for a short-cut.

Press button.

1) Press the MENU button of the control panel or remote control to display the on screen menu (main menu, sub-menu or detailed menu). For the menu operation, see “Navigating through the MENU”. (page 27)

2) Press and hold the FUNCTION button of the control panel or remote control for 3 seconds or more.

Remarks

- When not using the FUNCTION button

1) Select DISABLE in this menu (FUNCTION BUTTON in the PROJECTOR SETUP menu).

2) Press the ENTER button.

3) Select OK.

4) Press the ENTER button.

Remarks

- For details, see “FUNCTION BUTTON” in the “PROJECTOR SETUP menu”. (page 41)
Navigating through the MENU

Operating procedure

1) Press the MENU button. The main menu is displayed.

2) Press ▲▼ to scroll to the required main menu item and press the ENTER button to select.
Select the required menu item from the PICTURE, POSITION, LANGUAGE, DISPLAY OPTION, PROJECTOR SETUP, SECURITY and NETWORK menu. The selected item is highlighted in orange and displays the sub-menu on the right.

3) Press the ENTER button. You can select a sub-menu item.

4) Press ▲▼ buttons to scroll to the required sub-menu item and press ◄► buttons or the ENTER button to adjust.
The selected item is called up and the other menu items disappear from the screen.

If there is a lower level, the next level will be displayed.

Remarks

- Press the MENU or RETURN button to return to the previous menu. Press repeatedly to escape from the menu mode and return to the projection.
- Some items and functions may not be adjusted or available, depending on the selected input signals.
- Some settings are adjustable without any signals.
- Called up item will disappear after 5 seconds without any operation and return to the menu mode.
- For the sub-menu items, see “Sub-menu” in the “ON-SCREEN MENU”. (page 28)

Resetting to the factory default settings.

You can reset most of the customised settings to the factory defaults by pressing the DEFAULT button of the remote control.

Press DEFAULT button.

The operation depends on the screen displayed currently.

- While the sub-menu screen is displayed:
The items of the sub-menu displayed currently are reset to the factory default settings.
- While the called up item screen is displayed:
Only the item adjusted currently is reset to the factory default setting.

Remarks

- You cannot reset all the settings at a time to the factory default settings.
To reset all the settings to the factory defaults, see “INITIALIZE ALL” in the “PROJECTOR SETUP menu”. (page 42)
- Some menu items are not available to reset by pressing the DEFAULT button. Adjust each menu item manually.
- The triangle mark under the bar indicates factory default setting and the square indicates the current setting.
The triangle mark position varies by the selected input signals.

*1: PT-LB90NTEA only
Menu Navigation

The menu system allows you to access functions which do not have their own dedicated buttons on the remote control. The menu options are structured and categorized. For the menu operation, see “Navigating through the MENU”. (page 27)

ON-SCREEN MENU

Press *button.

The ON-SCREEN MENU is displayed.

The ON-SCREEN MENU consists of the main menu and sub-menu.

Main menu

The main menu has the 7 options. Select the required menu item and press ENTER to display the sub-menu.

Sub-menu

Select the required sub-menu item and press ENTER to display the detailed menu.

Remarks

- Sub-menu items and the factory default settings vary according to the selected input signal.
PICTURE menu

Navigating through the MENU (page 27), select PICTURE from the main menu and then select the required item from the sub-menu.

- Set the selected item with buttons.

Remote control | Control panel

PICTURE MODE

Depending on the projection environment, you can optimize the image projection.

Change setting | Change setting

Press buttons to cycle through the options.

STANDARD | DYNAMIC

NATURAL | WHITE BOARD | BLACKBOARD

STANDARD Setting for general image
DYNAMIC Setting for brightness and sharpness
BLACKBOARD Setting for when projecting on a blackboard
WHITE BOARD Setting for when projecting on a white board
NATURAL Reproducing the original colour of the image

Remarks
- It may take a while until the selected mode is stabilised.

CONTRAST

You can adjust the contrast of the projected image.

Lower | Higher

BRIGHTNESS

You can adjust the brightness of the projected image.

Darker | Brighter

COLOR

You can adjust the colour saturation of the projected image. (Available with signals of S-VIDEO/VIDEO/RGB (Moving image)/YPbPr only)

Lighter | Darker

TINT

You can adjust the skin tone in the projected image. (Available with signals of S-VIDEO/VIDEO/RGB (Moving image)/YPbPr only)

More reddish | More greenish

SHARPNESS

You can adjust the sharpness of the projected image.

Less sharp | More sharp

Remarks
- The adjustable range depends on the input signal.

WHITE BALANCE

You can adjust the white balance more properly in 3 colours temperature. (Available with signal of RGB (Still image) only)

-1 | +1

Press buttons to cycle through the options.

Advanced menu item | Default
---|---
WHITE BALANCE RED | 0
WHITE BALANCE GREEN | 0
WHITE BALANCE BLUE | 0

COLOR TEMPERATURE

You can adjust the white balance of the projected image.

Change setting | Change setting

DEFAULT | HIGH | LOW

DEFAULT Balanced white
HIGH More bluish
LOW More reddish
PICTURE menu

DAYLIGHT VIEW
You can keep the projected image bright and vivid even in well-lit rooms where the ambient light sources cannot be controlled, such as when a door opens or when window coverings fail to block out sunlight.

Change setting
AUTO ON OFF

AUTO Automatic adjustment
ON Active
OFF Deactive

Remarks
- Do not cover the Ambient Luminance Sensor (ALS) of the projector. The AUTO mode may not operate normally.
- AUTO is not available when INSTALLATION in PROJECTOR SETUP menu is set to REAR/DESK or REAR/CEILING.

STILL MODE
You can reduce the vertical flicker when projecting a still image.
(Available with signals of S-VIDEO/VIDEO only)

Change setting
OFF ON

OFF Deactive
ON Active

Note
- You must set to OFF when projecting a moving image.

NOISE REDUCTION
You can switch the automatic noise reduction system on/off.
(Available with signals of S-VIDEO/VIDEO only)

Change setting
OFF ON

OFF No noise reduction
ON Automatic noise reduction

Note
- NOISE REDUCTION is set active when the selected input signal has less noise. Applying noise reduction may affect the image quality, if so, set to OFF.

TV-SYSTEM
When the video signal is changed, the setting switches automatically. You can switch the setting manually to match the video data.
(Available with signals of S-VIDEO/VIDEO only)

Change setting
AUTO NTSC NTSC4.43

SECAM PAL-N PAL-M PAL

Note
- AUTO mode is selected by default.
- When the projector is not working properly in AUTO mode, change the setting according to each TV system type.

Remarks
- AUTO setting will automatically select the compatible signal from NTSC/NTSC 4.43/PAL/PAL60/PAL-M/PAL-N/SECAM.

RGB/YPbPr
AUTO mode is selected by default. If the image is not projected normally in the AUTO mode, select RGB or YPbPr according to the input signal. The function becomes effective only when certain signals below are input.
(VGA60, 480i, 576i, 480p, 576p, 1080/60i, 1080/50i, 720/60p, 720/50p)
Select the signals to be input to the COMPUTER1 and COMPUTER2 IN terminal.

Change setting
AUTO RGB YPbPr

AUTO Automatic adjustment
RGB For RGB signals
YPbPr For YPbPr signals
Navigating through the MENU (page 27), select POSITION from the main menu and then select the required item from the sub-menu.

- Set the selected item with ▲▼◄► buttons.

**REALTIME KEYSTONE**

If the projector is aligned non-perpendicularly to the screen, or if the projection screen has an angled surface, the keystone will be corrected automatically.

**KEYSTONE**

If you need to correct the angle of the projection even when the REALTIME KEYSTONE is activated, you can correct the keystone manually.

<table>
<thead>
<tr>
<th>Image</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><img src="image" alt="Keystone Adjustment" /></td>
</tr>
</tbody>
</table>

**Remarks**

- You can correct the distortion ±30° from the plane. For a better quality image, installing the projector with a minimum of distortion is recommended.
- The distortion of the Main menu screen is not correctable.
- The result of the keystone correction will affect the aspect ratio and the size of the image.

**SHIFT**

Horizontal (H): Press ◄► buttons to move the image horizontally.

Vertical (V): Press ▲▼ buttons to move the image vertically.

**SHIFT V**

(Available with signal of network only while ASPECT is set to H FIT)

Press ◄► buttons to move the image vertically.

**DOT CLOCK**

If you have interference patterns of the projected image, which is sometimes referred to as moire or noise, you can minimize it by pressing ◄► buttons to adjust the clock frequency.

(Available with signals of RGB (Still image) only).

**Note**

- DOT CLOCK needs to be adjusted before adjusting the CLOCK PHASE.

**CLOCK PHASE**

If you require further adjustment for the same reason as the DOT CLOCK adjustment, you can fine adjust the timing of the clock. (Available with signals of RGB/YPbPr only)

Press ◄► buttons to adjust.

**Remarks**

- If the projecting signal's dot clock frequency is higher than 150 MHz, the adjustment of DOT CLOCK or CLOCK PHASE may not make a difference. See “List of compatible signals”. (page 52)
OVER SCAN

Use this function when characters or pictures are cropped near the periphery of the projected image. (Available with signals of S-VIDEO/VIDEO/RGB (Moving image)/YPbPr only)

- Setting range: 0 to +3

Remarks
- OVER SCAN is not available when network signals are input.

ASPECT

You can switch the aspect ratio manually when needed. Selectable options vary according to input signal.

- Change setting
- Change setting

AUTO 4:3 16:9

THROUGH H FIT

S4:3 HV FIT V FIT

Remarks
- AUTO mode is displayed only when NTSC 480i signal is input.
- THROUGH mode is displayed only for certain signals.
- For the wide signal *2, the aspect ratio cycles through 16:9 V FIT HV FIT.

AUTO (Available with signal of NTSC 480i only)
The signal which contains an identifying signal will be detected and will automatically project the image in the most optimal aspect ratio.

16:9

When a standard signal *1 is input, it is projected in 16:9 aspect ratio.
When a wide signal *2 is input, it is projected in the current input aspect ratio.

- Input signal: 1 080/60i

Image: Panel:

H FIT

When a standard signal *1 is input, it is projected without changing the aspect ratio, using all the panel pixels in the horizontal direction and cropping the top and bottom of the image.

- Input signal: SXGA

Image:

V FIT

When a wide signal *2 is input, it is projected without changing the aspect ratio, using all the panel pixels in the vertical direction and cropping the right and left of the image.

- Input signal: 1 080/60i

Image:

HV FIT

The image is projected all over the panel pixels (screen). The input signal is projected at the aspect ratio of the panel (screen).

- Input signal: 1 080/60i

Image:

*1: A standard signal has an aspect ratio of 4:3 or 5:4.
*2: A wide signal has an aspect ratio of 16:10, 16:9 or 15:9.
POSITION menu

S4:3

When a standard signal *1 is input, the input signal will be sized down 75% and projected. S4:3 mode is effective when projecting 4:3 image onto a 16:9 screen.

- Input signal: XGA

![Image: [Diagram of S4:3 mode]]

THROUGH

The image will be projected without any size adjustment.

- Input signal: NTSC

![Image: [Diagram of THROUGH mode]]

*1: A standard signal has an aspect ratio of 4:3 or 5:4.

Note

- If you project a 4:3 image onto a 16:9 screen, the image may distort or some portions may be cropped. Select an aspect ratio (4:3) which preserves the intention of the image creator.

Remarks

- The order of ASPECT types is defined not only by the input method but also by the input signals.
- If you project a copyrighted image enlarged or distorted by using ASPECT function in commercial use in a public place, such as a restaurant or hotel, you might infringe on the copyright of the creator which is protected by copyright law.

FRAME LOCK

If the projected image is degraded, you can activate FRAME LOCK for synchronisation. (Available with signals of RGB only)

THROUGH

The image will be projected without any size adjustment.

- Input signal: NTSC

![Image: [Diagram of THROUGH mode]]
Navigating through the MENU (page 27), select LANGUAGE from the main menu and then display the sub-menu.

- Select the required language with ▲▼ buttons and press the ENTER button to set.

The set language is highlighted.
DISPLAY OPTION menu

Navigating through the MENU (page 27), select DISPLAY OPTION from the main menu and then select the required item from the sub-menu.

- Set the selected item with ◄► buttons.

Remote control  Control panel

ON-SCREEN DISPLAY
You can set the on-screen display.

Change setting ◄► Change setting

INPUT GUIDE
When you change the input method, the guidance appears in the upper right corner of the screen. The following display methods are available.

<table>
<thead>
<tr>
<th>Style</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DETAILED</td>
<td>Display the input method by graphic. The INPUT GUIDE will go out after 10 seconds without any operation.</td>
</tr>
<tr>
<td>OFF</td>
<td>Turn off the guidance.</td>
</tr>
<tr>
<td>SIMPLE</td>
<td>Display the input method by text. The INPUT GUIDE will go out after 5 seconds without any operation.</td>
</tr>
</tbody>
</table>

Remarks
- If you select the computer terminals which have no signals while INPUT GUIDE is set to DETAILED, the computer connection guidance will be displayed. If you want to turn off the guidance, select SIMPLE or OFF.

Computer connection guidance
You can switch the signals which output from the COMPUTER1/COMPUTER2 terminal by pressing the following computer key commands.

- Panasonic
- NEC
- Acer
- HP
- SHARP
- TOSHIBA
- Lenovo
- SONY

- DELL
- EPSON
- FUJITSU
- Apple

WARNING MESSAGE
You can choose to display or not to display the warning massages.

<table>
<thead>
<tr>
<th>Setting</th>

Note
- When the WARNING MESSAGE is set to OFF, use the projector with utmost care due to the most of warning messages will not be displayed.

STARTUP LOGO
You can set to display the Panasonic logo, your own image or Pre-set letters, when starting up the projector.

Change setting ◄► Change setting

- ON  Display “Panasonic” logo
- TEXT Display the original text
- USER Display the image registered by user
- OFF  No display

Remarks
- If TEXT is selected, the input letters are displayed when starting up the projector. You can display 2 lines of original text which contain up to 40 characters each.
- If USER is selected, the image transferred by the Logo Transfer Software is displayed when starting up the projector. (You can download the Logo Transfer Software from the Panasonic Projector website (http://panasonic.net/avc/projector/download/).)
- STARTUP LOGO will be displayed for 30 seconds.
Editing the original text

1) Press◄►buttons to select TEXT and press the ENTER button.

2) Press▲▼buttons to select the required line and press the ENTER button.
   You can enter and edit the texts for the first line in TEXT1 and the texts for the second line in TEXT2.

3) Press▲▼◄►buttons to select the required character and press the ENTER button.
   To delete all the entered characters, move the cursor to ALL DELETE and press the ENTER button. To delete a character, press the DEFAULT button or move the cursor to the required character then press the DEFAULT button.

4) Select OK and press the ENTER button to set the entered text in a box.

5) Select OK again and press the ENTER button.
   Select CANCEL or press the MENU/RETURN button to return to the previous menu without setting.

You can perform some of the remote control button operations from the sub-menu.

- **AUTO SETUP**
  For details, see “Setting up the image position automatically”. ( page 25)

- **FREEZE**
  You can capture the projected image and see it as a still picture. While the image is frozen, the audio sound through the projector will stop.
  Press the RETURN button to escape.

- **AV MUTE**
  If you will not be using the projector for some time, you can stop the projection and audio sound temporarily.
  Press the RETURN button to escape.

- **INDEX-WINDOW**
  For details, see “INDEX-WINDOW display”. ( page 25)

- **DIGITAL ZOOM**
  
  ![Digital Zoom]

  ► button: zooms in
  ◄ button: zooms out
  Press the ENTER button to select the enlargement range.
  Press the RETURN button to escape.
Navigating through the MENU (page 27), select PROJECTOR SETUP from the main menu and then select the required item from the sub-menu.

- Set the selected item with ◄► buttons.

| Remote control | Control panel |

**STATUS**

You can check the using status of the projector.

- **SIGNAL**
  - NAME: Name of input signal
  - FREQUENCY: Scanning frequency of input signal

- **RUNTIME**
  - PROJECTOR: Display current usage time of projector
  - LAMP: Display current usage time of lamp

**NO SIGNAL SHUT-OFF**

If no image signal is input for the time set with the timer, the projector will enter into standby mode automatically.

**INITIAL START UP**

You can set the starting method when the mains plug is connected to mains socket.

| Change setting | Change setting |

- **LAST MEMORY**
  - Projector starts from the last image before the mains plug was disconnected

- **STANDBY**
  - Projector starts in the standby mode

- **ON**
  - Projector starts immediately

**INSTALLATION**

When installing the projector, select the projection method according to the projector position.

(►page 16)

- **FRONT/DESK**
  - Setting on a desk/floor and projecting from front

- **FRONT/CEILING**
  - Mounting in the ceiling with a ceiling mount bracket (sold separately) and projecting from front

</tr>
</thead>
<tbody>
<tr>
<td>NORMAL</td>
<td>When higher luminance is required</td>
</tr>
<tr>
<td>ECO</td>
<td>When lower luminance is sufficient</td>
</tr>
</tbody>
</table>

Remarks
- When no input signal is detected, this function is disabled.
- The ECO setting is recommended when higher luminance is not required such as in a small room.

LAMP RUNTIME

You can check how long the lamp has been used.

Note
- LAMP RUNTIME is a relevant matter for lamp replacement timing. See “Replacing the Lamp unit” (page 48).
- Check the lamp unit replacement time. (page 48)

Remarks
- If the lamp runtime has reached 2800 hours, the red (time indicator) and grey marks appear alternately to notify you of the lamp replacement time.
- The lamp life varies with its condition of use (number of power-on times, etc.).

EMULATE

When the projector is controlled with a computer through serial input terminal, you can change the setting to use the former projector control commands.

1) Press the ENTER button.
2) Press ▲▼ buttons to select the required setting.
3) Press the ENTER button.

FUNCTION BUTTON

You can select a useful function from the list and assign it to the FUNCTION button as a short-cut.

1) Press the MENU button of the control panel or remote control to display the on screen menu (main menu, sub-menu or detailed menu).
   For the menu operation, see “Navigating through the MENU”. (page 27)

2) Press and hold the FUNCTION button of the control panel or remote control for at least 3 seconds.

● When not using the FUNCTION button

1) Select DISABLE in this menu (FUNCTION BUTTON in the PROJECTOR SETUP menu).
2) Press the ENTER button.
3) Select OK.
4) Press the ENTER button.

Remarks
● After the setting is completed, the text colour and button colour will change.
● You can assign all the menu items, excluding the sub-menu of the SECURITY menu (PASSWORD, PASSWORD CHANGE, TEXT DISPLAY, TEXT CHANGE, MENU LOCK, MENU LOCK PASSWORD and CONTROL DEVICE SETUP).
● The displayed menu screen will disappear after 5 seconds without any operation, and the setting will be confirmed.

AUDIO SETTING

You can perform more detailed setting for Audio.

VOLUME
You can adjust the volume of the built-in monaural speaker and VARIABLE AUDIO OUT terminal.

BALANCE
You can adjust to hear the sound played equally through both right and left external stereo speakers, or shift the balance so more sound plays through the left or right side.
TEST PATTERN

You can use the 7 different test patterns to adjust the focus of the image. Press the ENTER button to display the test pattern.

Change pattern  

Press the MENU or RETURN button to return to the PROJECTOR SETUP menu, or press repeatedly to escape the menu mode.

Remarks
- The initial screen is an all white pattern. Only when TEST PATTERN is assigned to the FUNCTION button, the lattice pattern will display in the initial screen.

INITIALIZE ALL

You can reset all of the customised settings in the MENU to the factory defaults.

- If the ENTER button is pressed in the INITIALIZE ALL menu, INITIALIZE ALL will display. Select OK and press the ENTER button, NOW INITIALIZING... is displayed. Then, POWER OFF is displayed. Select OK and turn off the power according to the instruction. (All other buttons are deactivated.)
- The INITIAL SETTING menu screen will display when the power is connected.

Remarks
- The usage time of the projector, lamp runtime and the NETWORK settings are not initialised.
- When PASSWORD in SECURITY menu is activated, be sure to enter the correct password when initialised.
- After INITIALIZE ALL operation is completed, the password is reset to the factory default setting and PASSWORD setting is turned OFF.
SECURITY menu

Navigating through the MENU (page 27), select SECURITY from the main menu and then select the required item from the sub-menu.

- When you apply to the SECURITY menu for the first time, you will be asked to perform the password operation. Input the initial password by pressing ▲►▼◄▲►▼◄ buttons in order and then press the ENTER button.
- Set the selected item with◄►buttons.

Note
- Perform the above operation after the SECURITY menu is displayed.
- If you have changed the password, input the new password and press the ENTER button.

PASSWORD

You can activate the security system and the password operation will be asked to perform when projecting mode started.

Change setting — Change setting

<table>
<thead>
<tr>
<th>OFF</th>
<th>Deactive</th>
</tr>
</thead>
<tbody>
<tr>
<td>ON</td>
<td>Active</td>
</tr>
</tbody>
</table>

Remarks
- PASSWORD is set to OFF by default and when initialised.
- Change your password regularly. Do not use a simple password that is too easy to guess.
- Unless you perform the correct password operation, all of the button controls will be disabled except the POWER button.

PASSWORD CHANGE

You can change the password operation to your original.

1) Press ▲▼◄►buttons to change the password.
   (Up to eight button operations can be set.)
2) Press the ENTER button.
3) Input the password again and press the ENTER button.

Remarks
- The entered password operations will appear as asterisks in the box.
- If a series of button operation is incorrect, you will be asked to perform again.

TEXT DISPLAY

You can set your original text to display regularly at the bottom of the projected image while projecting.

Change setting — Change setting

<table>
<thead>
<tr>
<th>OFF</th>
<th>Deactive</th>

<td>Lock the menu operation</td>
</tr>
</tbody>
</table>

Remarks
● Once MENU LOCK is set to ON, you cannot use the MENU button unless you input the correct password.
● The MENU LOCK is set to OFF by default and when initialised.

MENU LOCK PASSWORD
When MENU LOCK is set to ON, you can set a MENU LOCK PASSWORD.

1) Press ▲▼◄►buttons to select the required character and press the ENTER button.
(You can input up to 16 characters.)
To delete all the entered characters, move the cursor to ALL DELETE and press the ENTER button. To delete a character, press the DEFAULT button or move the cursor to the required character then press the DEFAULT button.

MENU LOCK PASSWORD

2) Press ▲▼◄►buttons to select OK and press the ENTER button.
Select CANCEL or press the MENU/RETURN button to return to the previous menu without setting.

Remarks
● When using the projector for the first time or after INITIALIZE ALL operation is activated, the initial password is set as AAAAA.
● Change your password regularly. Do not use a simple password that is too easy to guess.
● To reset the password to the initial password, see “MENU LOCK PASSWORD” (page 54).

CONTROL DEVICE SETUP
You can enable/disable the button operations of the control panel and remote control.

Change setting ▼ Change setting

■ CONTROL PANEL

Remarks
● If DISABLE is set, the confirmation screen appears. Select OK and press the ENTER button.
● If any button is pressed when DISABLE is set, the password screen appears. Input the password which is set in the SECURITY menu.
● The PASSWORD screen will be displayed for 10 seconds.
● If you set both CONTROL PANEL and REMOTE CONTROLLER to DISABLE, all the button operations of the control panel and remote control are disabled and you cannot turn off the power.
● In the standby mode, press and hold the ENTER button of the control panel and MENU button for at least 2 seconds. The buttons on the control panel are enabled.
You can also enable the button operation by pressing and holding the ENTER button of the control panel and MENU button for at least 2 seconds while the projector is projecting.
Navigating through the MENU (page 27), select NETWORK from the main menu and then select the required item from the sub-menu.

- Set the selected item with buttons.

**Remote control**

**Control panel**

---

### STATUS
You can display the status of the network setting.

### INITIALIZE
You can reset the settings of the network to the factory default settings.

**Remarks**
- When PASSWORD in the SECURITY menu is activated or the network setting is initialised, you will be required to input the password.

---

### Remarks
- These items are set for network connection with a computer. For details of the PJ Link and network, see "NETWORK operation manual" in the CD-ROM provided.

---

### WIRED LAN
You can set a wired LAN.

### WIRELESS LAN
You can set a wireless LAN.

### NAME CHANGE
You can change the name of the projector.

### INPUT PASSWORD
When checking the password for the network connection, you must turn this function ON.

### PASSWORD CHANGE
You can change the password for the network connection.

### NETWORK CONTROL
When controlling the projector with a computer on the network, you must turn this function ON.

### LIVE MODE CUT IN
Set this function to ON to allow other users to connect to live mode while the projector is operating in the live mode of the network.

### COMPUTER SEARCH
You can search for a computer on the network.

### MULTI-LIVE
This function is available when a network input signal is detected.
Managing the indicated problems

If a problem should occur with the projector, the LAMP and/or TEMP indicators will inform you. Manage the indicated problems as follows.

Note

- When managing a problem, be sure to turn off the power as described in “Switching off the projector”. ( página 22)

Remarks

- Confirm the power supply status by the POWER indicator. ( página 20)

LAMP indicator

<table>
<thead>
<tr>
<th>Indicator</th>
<th>• Illuminating red</th>
<th>• Flashing red</th>
</tr>
</thead>
<tbody>
<tr>
<td>Problem</td>
<td>LAMP RUNTIME has reached 2 800 hours.</td>
<td>LAMP circuit failure, abnormal function or the lamp unit is damaged.</td>
</tr>
<tr>
<td>Cause</td>
<td>Lamp unit will run out soon and needs to be replaced.</td>
<td>The projector is switched on again too soon.</td>
</tr>
<tr>
<td>Remedy</td>
<td>See “Replacing the Lamp unit”. ( página 48)</td>
<td>Let the lamp unit cool down and turn on the projector after 90 seconds.</td>
</tr>
</tbody>
</table>

Remarks

- If the LAMP indicator still lights or flashes after the above remedy, contact an Authorised Service Centre.

TEMP indicator

<table>
<thead>
<tr>
<th>Indicator</th>
<th>• Illuminating red while projecting and the alert will be displayed.</th>
<th>• Flashing red and power is turned off.</th>
</tr>
</thead>
</table>
| Problem   | The temperature inside and/or outside the projector is abnormally high.  
• The projection may becomes darker than usual.  
• The internal fan operational noise may be louder than usual. |
| Cause     | The air outlet port and air intake ports are covered.  
The room temperature is too high.  
The filter is excessively dirty and the ventilation is poor.  
The projector is located at 1 400 - 2 700 m (4 593 - 8 858 ft). |
| Remedy    | Remove the object(s) from the air outlet port and air intake ports or clear around the projector.  
Reinstall the projector in temperature controlled place. ( página 56)  
Clean the filter in the proper method. ( página 47)  
Turn on the projector*1 and set the HIGH ALTITUDE MODE to ON. ( página 39) |

Remarks

- Take the above remedy, disconnect the mains plug, and then supply the power again. If the TEMP indicator still lights or flashes after the above remedy, contact an Authorised Service Centre.
- If the environment temperature in the projector rises, the fan speed increases and the sound becomes louder.

*1: The projector will perform 2 minutes with OFF setting at high elevation.
Before Care and Replacement

- Before cleaning, be sure to turn off the power and disconnect the mains plug from the mains socket. (page 19)
- Be sure to turn off the power as described in “Switching off the projector”. (page 22)

Cleaning the projector

**Cabinet**
Wipe off dirt and dust gently with a soft cloth.
- If it is difficult to remove the dirt, soak a cloth with water, wring the cloth well and then wipe the projector.
- Dry off the projector with dry cloth.
- Do not use petroleum benzine, thinner, any alcoholic solvent, kitchen detergents or chemical clothes.
Failure to observe these may result in altered or damaged surfaces of the projector.

**Lens cover**
Make sure no dirt or dust remains on the surface of the lens cover glass. It will be enlarged and projected onto the screen.
Wipe off dirt and dust gently with a lint-free cloth. Do not wipe the lens cover with a cloth which has collected dust.

**Note**
- Clean the lens cover with special care. Giving a shock may cause serious damage.

**Air filter**
If the air filter is excessively dirty, the internal temperature of the projector increases, the TEMP indicator lights, and the power is turned off. If the power is turned off, the TEMP indicator flashes. Clean the air filter regularly every 100 hours of usage.

1) **Turn the projector upside down and place it gently on a soft cloth.**
- Place the projector softly so that it will not be damaged.
- Press the tab and slightly slide up the air filter to remove.

2) **Clean the air filter.**
Vacuum dirt and dust from the air filter.

3) **Install the air filter.**

**Remarks**
- Do not use the projector without attaching the air filter. Otherwise, it will suck in dirt and dust which can cause malfunction.
Care and Replacement

Replacing the Lamp unit

■ Air filter
The air filter should be replaced when cleaning is ineffective and when replacing the lamp unit. A replacement air filter is provided with a replacement lamp unit (ET-LAB80). Contact an Authorised Service Centre for the optional air filter (TXFMZ01VKG7).

■ Lamp unit
The lamp unit, ET-LAB80 is consumable and you must replace it regularly. It is recommended that a qualified technician carry the lamp unit replacement and consult with an Authorised Service Centre.

■ Note on lamp unit replacement
- Handle the lamp unit with special care as it is a glass product. Dropping or giving it a shock may cause it to burst or to be damaged.
- If you wish to discard the used lamp, please contact your local authorities or dealer and ask for the correct method of disposal.
- Prepare a Phillips-head screwdriver.
- When replacing the lamp unit, be sure to hold it by the handle.
- Hold the lamp unit horizontally to prevent broken pieces from scattering. When the projector is mounted in the ceiling, do not work directly under the projector or put your face close to the projector, and pull out the lamp horizontally.

Note
- Prior to replacing the lamp unit, allow it to cool down to prevent the risk of burns, damage and other hazards.

Remarks
- Do not attempt replacement with an unauthorised lamp unit.

■ Lamp unit replacement time
When the lamp is consumed, the brightness may decrease over time. 3 000 hours of use is the replacing time as a rough guide, and that might be shortened by the usage conditions, characteristics of the lamp unit or environmental conditions. You can find the duration of usage time by checking LAMP RUNTIME in the PROJECTOR SETUP menu. Do not use a lamp unit over 3 000 hours. Failure to observe this may result in explosion of the lamp.

<table>
<thead>
<tr>
<th>ON-SCREEN DISPLAY</th>
<th>LAMP indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>REPLACE LAMP</td>
<td>LAMP</td>
</tr>
</tbody>
</table>

| 2 800 hours       | Displays “REPLACE LAMP” on the upper left of the screen for 30 seconds. If any button is pressed within 30 seconds, the message disappears. | Illuminates red, even in the standby mode. |
| 3 000 hours       | Displays “REPLACE LAMP” on the upper left of the screen, and it will stay until you respond. The power is turned off automatically in 10 minutes. |

Remarks
- The guide time, 3 000 hours, is a rough estimate based on certain conditions and is not a guaranteed time.
## Lamp replacement procedure

- When the projector is mounted in the ceiling, do not work directly under the projector or put your face close to the projector.
- Be sure to install the lamp unit and attach the lamp unit cover securely.

1) Disconnect the mains plug from the mains socket according to “Switching off the projector” (page 22), wait for at least 1 hour, and check if the lamp unit bottom is cooled.

2) Use a Phillips-head screwdriver to loosen the 2 lamp unit cover fixing screws on the back of the projector until the screws turn loose, and remove the lamp unit cover.

3) Use a Phillips-head screwdriver to loosen the 3 lamp unit fixing screws. Pull the used lamp unit gently from the projector.

4) Press in the lamp unit until it clicks and make sure the unit is installed securely. Tighten the 3 lamp unit fixing screws securely with a Phillips-head screwdriver. When inserting, in particular press the portion of A securely.
5) Attach the lamp unit cover and tighten the 2 lamp unit cover fixing screws securely with a Phillips-head screwdriver.

6) Connect the mains lead to a mains socket.

7) Press the POWER button and the projection starts.

Remarks
- If INITIAL START UP in the PROJECTOR SETUP menu is set to ON, the projector starts projecting when the mains lead is connected to a mains socket. (page 39)

8) Press the MENU button to display the main menu and press ▲▼ buttons to scroll to the PROJECTOR SETUP menu.

9) Press the ENTER button to select the PROJECTOR SETUP menu and press ▲▼ buttons to select LAMP RUNTIME.

10) Press and hold the ENTER button for approximately 3 seconds.
- The LAMP RUNTIME confirmation screen is displayed.

Note
- If any button other than the POWER button is pressed, the LAMP RUNTIME screen disappears and the lamp runtime is not reset. (Repeat from step 8 again).

11) Press the POWER button.
- After the lamp goes off, projection stops and the POWER button lights in red, then disconnect the mains plug.

12) The lamp runtime is reset to “0”.
## Troubleshooting

Confirm the following problem and cause.  
Should any problem persist, contact an Authorised Service Centre.

</tbody>
</table>

*1: The “i” appearing after the resolution indicates an interlaced signal.
*2: The following symbols are used to indicate picture quality.
  AA: Maximum picture quality can be obtained.
  A : Signals are converted by the image processing circuit before picture is projected.
  B : Some loss of data occurs to make projection easier.
*3: The signals marked with circles (○) can be applied by plug-and-play device.
Serial terminal

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specifications, so that the projector can be controlled by a personal computer which is connected to this connector.

Basic format

The data streaming from the computer will start with STX, and proceed to Command, Parameter and end with ETX.

You can add the required parameter.

Note

- The projector can not receive any command for 10 seconds after the lamp is switched on. Wait for 10 seconds before sending the command.
- If sending multiple commands, check if a response has been received from the projector for one command before sending the next command.
- When a command which does not require parameters to be sent, the colon (:) is not required.

Remarks

- If an incorrect command is sent from the personal computer, the ER401 command will be sent from the projector to the personal computer.

## Ceiling mount bracket safeguards

- Installation work of the ceiling mount bracket should only be carried by a qualified technician.
- Even if it is during guaranteed period, the manufacturer is not responsible for any hazard or damage caused by using a ceiling mount bracket which is not purchased from an authorised distributors, or environmental conditions.
- Remove an unused ceiling mount bracket promptly.
- Make sure to use a torque driver and do not use an electrical screwdriver or an impact screwdriver.

* Torque: 1.25 ± 0.2 N·m
